

**Round Rock ISD – 2008-09
5E Lesson Plan**

Teacher: 5th Grade

Date: 8/25/09-8/28/09

Subject area / grade level: Math 5th

Materials: Cans, ping pong balls, base ten blocks and cubes, paper, pencil

TEKS/SEs: 5.1A/ 5.4A/B

—3 day progression, where amounts of cans increase as place value discussion expands (final goal ending in billions)

Vocabulary: Place value, digit, value, expanded form, standard form

Lesson objective(s): Recognizing value and place value, having students understand that no more than nine units per place value, that each place changes its value. A digit has to have a place to have a value.

Differentiation strategies to meet diverse learner needs:

Different size numbers

-Students who easily master concepts can begin making comparisons while journaling on their newfound math knowledge

Engagement

- Describe how the teacher will capture students' interest.
- What kind of questions should the students ask themselves after the engagement?
- Begin w/ students throwing blank ping pong balls into 3 color coded cans with space between them, so they seem totally separate
- Tell students the only rule is nine balls can fit into a can.
- If there are more than nine balls thrown into a can ask "What are you going to do now?" "What can we do?"
- Wait for student to suggest to move ball to another can

Exploration

- Describe what hands-on/minds-on activities students will be doing.
- List "big idea" conceptual questions the teacher will use to encourage and/or focus students' exploration
- Putting labels on the coffee cans and only ping pong balls
- Some cans are more valuable than others - KC
- Asking "If there are 5 balls in this can labeled ones, what do you have, what is the value?" 5 x 100
- Writing out how many is in each can leading to the explanation of the value

Explanation

- Student explanations should precede introduction of terms or explanations by the teacher. What questions or techniques will the teacher use to help students connect their exploration to the concept under examination?
- List higher order thinking questions which teachers will use to solicit student explanations and help them to justify their explanations.
- A conversation describing how the values of the numbers are different (based on the numbers thrown)
- "What is the difference between this five and this five (assuming they are in different cans)?"—This practices concept of base 10's
- Value vs Place Value and Digit / Keep in expanded form and random

Elaboration

- Describe how students will develop a more sophisticated understanding of the concept.
- How is this knowledge applied in our daily lives? (Next week)
- Making expanded form to standard form – KC
- "How could we bring these numbers together to make one complete value, one number?" / Adding cans/Base ten blocks
- Starting with expanded form/pushing together to form standard form
- Then, push buckets together and ask, "What number do we have now?"
- What are the different ways to write the numbers (Expanded, standard, etc)? Discuss that after three buckets, we need a comma

Evaluation:

- How will students demonstrate that they have achieved the lesson objective?

-assessment/verbally compare each other's findings, journaling, writing spoken numbers
