

HOW CALL FORWARDING WORKS

STEP ONE

A customer dials your phone number to connect with a service representative.

STEP TWO

The phone system accepts the call and forwards it to a predetermined destination.

STEP THREE

The call diversion system connects the incoming call (the call from the customer) and the outgoing call (the call from your phone provider to the destination you chose).

STEP FOUR

The pre-configured alternate phone number rings, and an agent picks up the call.

STEP FIVE

The agent will then be connected to the customer.
