Technical Analysis for Beginners Charles G. Koonitz, 2017-03-13 It's strange to observe that in an age where information is so abundant and easy to access a very small number of investors understand the functioning of the stock charts. Many more believe that the up and down level of a share is strongly connected to a company's profitability. Either because of doubt or a lack of understanding, most traders and investors trust their friends, colleagues, or pseudo specialist gurus to help them make good trading and investment choices. This book has been written to help the new traders who trust blindly in those close to them, their colleagues, or financial gurus, and want to understand chart patterns before investing in stocks. Take control of your investments. Technical Analysis for Beginners or Stop Blindly Following Stock Picks of Wall Street's Gurus and Learn Technical Analysis is easy to understand and it addresses the people who want to use tools that allow detection of buy and sell signals. This book includes more than 100 examples, figures, and tables that will help you understand investments visually. Several stock market charts show entry points, exit points, and even false signals. Dummies need to understand technical analysis. The best way to foresee the future is to analyze the past. This book is a guide to avoiding many traps in the financial markets. I will show you how to use the stock market charts and how to enrich them with indicators which will allow you to enter and exit the market at the right time. Know how to spot the market's trend. Learn how to detect the stages of a share to make a better anticipation of the sale periods. Numerous examples show you how to highlight the trend, the support, the resistance, and the trend channel, as well as the positive and negative divergences and the candlestick patterns. Identify breakout and breakdown. The term breakout is used by traders in action. It's associated with multiple upward figures and marks the debut of a new rising trend. Learn to detect and use breakout to make good selections of stocks. Identify bullish and bearish patterns. Certain configurations allow anticipating a configuration or a trend reversal. We have included numerous graphs and figures that facilitate learning. The examples are improved with comments and symbols that

facilitate comprehension Know how to use the different types of indicators There are a great number of technical indicators New ones are created each year However you should limit their use and make a choice among the four families of indicators that follow Trend indicators Momentum indicators Volatility indicators Volume indicators Avoid traps errors and false signals Technical analysis cannot guarantee 100 percent success The traps can be detected on a graph but they can also come from the ones that make purchase recommendations to you such as people that provide pump and dump scenarios or stock promoters from the web Graphic analysis of the shares is essential before any investment Understand the market s emotional cycle It s difficult to leave your emotions aside when your portfolio has lost 10 percent in just one day Don t put yourself in vulnerable situations Keep your emotions balanced by investing at the appropriate moment Configure your charts You only need a couple of minutes to do the technical analysis of a stock You can rapidly make judgments on the quality of the targeted shares or ETF Invest in your knowledge invariably be skeptical about the recommendations of specialists and analyze their choices before investing Technical analysis for beginners Part Two will be available soon

Anderson, 2020-10-06 Have you ever heard the word investing before but you have never understood what it really means It's actually quite simple it means making your money work while you do what you want Basically it's a different way of thinking about how to make money While growing up most of us have been taught that we can only earn an income by finding a good job and that's exactly what most of us do However there is a big problem with this if you want more money you have to work longer hours However there is a limit to the number of hours a day we can work on not to mention the fact that having a lot

of money is not fun if we do not have the time to enjoy it This is why rich people do not have a job they have businesses that work for them Think about it you have a job that allows you to earn over 2000 dollars a month but that takes you over 13 hours a day 6 days out of 7 so about 11 remain and usually the hours of sleep should be at least 7 8 for a healthy lifestyle Considering also the displacements and the time lost to go to work you have 3 to 4 hours left where you most likely will use 2 for dinner in the evening In the end there are 2 actual hours of time per day which do not allow you to enjoy life to the fullest You will find yourself having a 2000 dollars a month salary which nowadays is nothing that will continue to accumulate as you will not absolutely enjoy them in any way This is what is often called the rat race Is there a solution Yes it exists and it is to take part of your money and invest it properly in the financial markets By doing so you are letting it work for you The possibilities are scary and extremely profitable Do you want one example Take a look at Apple s stocks Apple s stocks have risen at a frightening rate in the last 10 years from 10 to about 100 This means that with an investment of only 1 000 you would now have over 10 thousand dollars This is the power of online investing it allows you to grow your money in a totally automatic way Unfortunately there is no duplication of self to increase the time at work but instead you can create an extension of yourself that is your money and put it to work In this way while you are working for your employer or while you are at the bar with friends you can still earn at the same time thanks to the investment you made In a very simple way therefore you can make your money useful thus maximizing your earning potential even if you do not receive an increase in your pay or even if you do not decide to make an extraordinary one or you are looking for a more remunerative job There are many ways to do this This includes investing your money in stocks bonds mutual funds forex CFDs or real estate and many other things or even starting your own online business like affiliate marketing Sometimes people refer to these options as investment vehicles which is just another way of saying a way of investing
