Technics And Civilization A History Of The:

Technics and Civilization Lewis Mumford, 2010-10-30 Technics and Civilization first presented its compelling history of the machine and critical study of its effects on civilization in 1934 before television the personal computer and the Internet even appeared on our periphery Drawing upon art science philosophy and the history of culture Lewis Mumford explained the origin of the machine age and traced its social results asserting that the development of modern technology had its roots in the Middle Ages rather than the Industrial Revolution Mumford sagely argued that it was the moral economic and political choices we made not the machines that we used that determined our then industrially driven economy Equal parts powerful history and polemic criticism Technics and Civilization was the first comprehensive attempt in English to portray the development of the machine age over the last thousand years and to predict the pull the technological still holds over us today The questions posed in the first paragraph of Technics and Civilization still deserve our attention nearly three quarters of a century after they were written Journal of Technology and Culture The Future of Technics & Civilization Lewis Mumford, 1986 A brilliant survey of our response to changing technology which sets out the prerequisites for a rational use of our discoveries and inventions as a means of human liberation rather than enslavement Technics and Civilization Lewis Mumford, 1963 Traces the evolution of the machine and describes its effects on man and his environment **Technics and Civilization** Lewis Mumford, 1965 *Fifty Years of Medieval Technology and Social Change* Steven A. Walton, 2019-08-22 This volume brings together a series of papers at Kalamazoo as well as some contributed papers inspired by the fiftieth anniversary of the publication of Lynn White Jr s *Medieval Technology and Social Change* 1962 a slim study which catalyzed the study of technology in the Middle Ages in the English speaking world While the initial reviews and decades long fortune of the volume have been varied it is still in print and remains a touchstone of an idea and a time The contributors to the volume therefore both investigate the book itself and its fate and look at new research furthering and inspired by White s work The book opens with an introduction surveying White s career with a bibliography of his work as well as some opening thoughts on the study of medieval technology in the last fifty years Three papers then deal explicitly with the reception and longevity of his work and its impact on medieval studies more generally Then five papers look at new cast studies areas where White s work and approach has had a particular impact namely medieval technology studies and medieval rural ecological studies **Medical Technics** Don Ihde, 2019-09-30 A personal account of the aging body and advanced technologies by a preeminent philosopher of technology Medical Technics is a rigorous examination of how medical progress has modified our worlds and contributed to a virtual revolution in longevity Don Ihde offers a unique autobiographical tour of medical events experienced in a decade beginning in his 70s Ihde offers experiential and postphenomenological analyses of technologies such as sonography and microsurgery and ultimately asks what it means to increasingly become a cyborg Forerunners Ideas First Short books of thought in process scholarship where intense analysis questioning and speculation

take the lead **Henry Ford, Mass Production, Modernism, and Design** Ray Batchelor, 1994 Henry Ford is often thought of as being the ultimate American folk hero who developed one of the most important changes to 20th century American society mass production With his successive teams of engineers Ford developed technologies which placed the motor car at the disposal of millions of people freeing them from previous notions of distance and space and re shaping the modern urban environment worldwide *A Global Encyclopedia of Historical Writing, Volume 2* D.R. Woolf, 2022-09-30 First published in 1998 Including a wide range of information and recommended for academic libraries this encyclopedia covers historiography and historians from around the world and will be a useful reference to students researchers scholars librarians and the general public who are interested in the writing of history Volume II covers entries from K to Z

Pioneers Of Ecological Humanism Morris Brian Morris, 2020-07-16 e Brian Morris blazed a lot of trails He is a scholar of genuine daring and great humanity and his work deserves to be read and debated for a very long time to come e David Graeber author of *Debt The First 5 000 Years* In our world of ecological catastrophe and social crisis some roundly condemn modern civilisation as the source of our Promethean predicament What can follow is a rejection of humanism science and the City and a turn to either nostalgic primitivism or esoteric spirituality But do we really need to flee the city for the woods in order to build a free society In this triple intellectual biography Brian Morris lucidly discusses three intellectual giants who made an enormous though often overlooked contribution to modern ecology Lewis Mumford Rene Dubos and Murray Bookchin Morris argues that they have forged a third way beyond both industrialism and anti modernism ecological humanism also known as social ecology a tradition that embraces both ecological realities and the ethical and cultural wealth of humanism In examining their thought Professor Morris paves the way for fresh debate on ecology charting an optimistic vision for the profound reharmonisation of nature and culture as well as the ecological egalitarian and democratic transformation of our cities and society Essential reading for anyone with an interest or active role in ecology or philosophy and their associated disciplines *Pioneers of Ecological Humanism* is written in a clear and refreshingly direct style that will appeal to academics activists and armchair ecologists alike Leaving school at the age of fifteen Brian Morris had a varied career foundry worker seaman and tea planter in Malawi before becoming a university teacher Now Emeritus Professor of Anthropology at Goldsmiths College University of London he is the author of numerous articles and books on ethnobotany religion and symbolism hunter gatherer societies and concepts of the individual His books include *Richard Jefferies and the Ecological Vision* 2006 *Religion and Anthropology A Critical Introduction* 2006 *Insects and Human Life* 2004 and *Kropotkin The Politics of Community* 2004 Black Rose Books is also the publisher of his *Bakunin The Philosophy of Freedom* 1993 and the forthcoming *Anarchist Miscellany* *Pioneers of Ecological Humanism* is essential reading for anyone concerned with these issues Conversant with the history of ideas Morris places Bookchin especially in a context that has eluded other authors who have treated his work His writing style is lucid and accessible Highly recommended Janet Biehl author partner of Murray

New Essays on the Frankfurt School of Critical Theory Alfred J. Drake, 2009 New Essays on the Frankfurt School of Critical Theory offers fifteen essays covering a variety of authors and topics related to the Frankfurt School of Critical Theory Institut für Sozialforschung that flourished from the 1920s in connection with the University of Frankfurt in Germany and then abroad The volume offers reflections on the Frankfurt School's critical dialogue with philosophical predecessors such as Marx and Nietzsche elucidates key debates between Frankfurt School authors and contemporaries and addresses the continuing significance of the Frankfurt School in the postmodern age with reference to major thinkers such as Fredric Jameson Antonio Negri Gilles Deleuze and Jacques Lacan Readers will find a lively but respectful debate on the strengths and limitations of Frankfurt notions about technology, negative dialectics, the Shoah and the utopian dimension of political thought among other concerns The aim of contributors throughout has been to broaden readers' understanding of the sophistication and integrity of Frankfurt School thought rather than reducing it to the level of the formulaic or polemical Music theory, the representation of urban spaces in prose and image and the theorization of childhood find a place in this appropriately diverse collection with essays on Lewis Mumford and Siegfried Kracauer broadening its scope

The Oxford Encyclopedia of Economic History Joel Mokyr, 2003 What were the economic roots of modern industrialism? Were labor unions ever effective in raising workers' living standards? Did high levels of taxation in the past normally lead to economic decline? These and similar questions profoundly inform a wide range of intertwined social issues whose complexity, scope and depth become fully evident in the Encyclopedia Due to the interdisciplinary nature of the field, the Encyclopedia is divided not only by chronological and geographic boundaries but also by related subfields such as agricultural history, demographic history, business history and the histories of technology, migration and transportation The articles, all written and signed by international contributors, include scholars from Europe, Latin America, Africa and Asia Covering economic history in all areas of the world and segments of economies

from prehistoric times to the present The Oxford Encyclopedia of Economic History is the ideal resource for students economists and general readers offering a unique glimpse into this integral part of world history **Technology and Values** Craig Hanks,2009-05-04 This anthology features essays and book excerpts on technology and values written by preeminent figures in the field from the early 20th century to the present It offers an in depth range of readings on important applied issues in technology as well Useful in addressing questions on philosophy sociology and theory of technology Includes wide ranging coverage on metaphysics ethics and politics as well as issues relating to gender biotechnology everyday artifacts and architecture A good supplemental text for courses on moral or political problems in which contemporary technology is a unit of focus An accessible and thought provoking book for beginning and advanced undergraduates yet also a helpful resource for graduate students and academics **Wind, Water, Work** Adam Lucas,2006-01-01 This book is the most comprehensive empirical study to date of the social and technical aspects of milling during the ancient and medieval periods Drawing on the latest archaeological evidence and historical studies the book examines the chronological development and technical details of handmills beast mills watermills and windmills from the first millennium BCE to c 1500 It discusses the many and varied uses to which mills were turned in the civilisations of Rome China Islam and Europe and the many types of mill that existed The book also includes comparative regional studies of the social and economic significance of milling and tackles several important historiographical issues such as whether technological stagnation was a characteristic of late Antiquity whether there was an industrial revolution in the European Middle Ages based on waterpower and how contemporary studies in the social shaping of technology can shed light on the study of pre modern technology **Reframing Technology** Kent Hufford,2024-07-22 For over a hundred years technological change has been framed using a simple narrative technology drives history Reframing Technology challenges this idea of technological determinism through metahistorical and literary analyses that locate the birth of contingent frameworks in the historiography of technology in and around the 1930s The book also traces how the formal discipline of the History of Technology was remarkably preconfigured by four North American authors who were not professional historians Thorstein Veblen Stuart Chase Lewis Mumford and Marshall McLuhan They are considered as a continuum and are put in dialogue despite their training in different disciplines Their work is then linked up with the emergence of formal and institutional inquiry into narratives of technology at the end of the twentieth century The ideas in the book are applied to current discussions about the future of technology and artificial intelligence The book s main argument is that as the authors listed above suggest we need to think beyond the machine and reframe technology as a cultural practice rather than thinking of it as an object or a tool **Kenneth Burke in the 1930s** Ann George,Jack Selzer,2007 An invitation to mingle with Burke in the 30s and witness the development of his major works of the era **Can We Zoom into God?** Andrew Hemingway,2023-10-19 When Zoom worship emerged in Britain during the COVID lockdown of 2020 Christians quickly turned to an art form a form of theater to deliver their worship It was a quest for

immanence the very thing the Reformation dealt with by the elevation of transcendence What an intriguing thought Could John Calvin with his dictum regarding piety have practiced Zoom worship Served as he was with the principle that the finite cannot contain the infinite we must admit it looks very unlikely At least in this Calvin saw eye to eye with Erasmus but what of Luther He may have been a comfortable Zoom worshiper with his views that Religious artworks are neither here nor there and We may have them or not as we please Little did the church realize that it would be a step back into the past because what you permit you promote The desire to use images was much more sinister than in Medieval times as these were now images of ourselves Regardless of the age the image reigns supreme What had caused the demise Was it bereavement It could not be bereavement of God rather it was the loss of the social the bereavement of one another The need for one another had forced the hand of Christians to turn to a practice completely untested Zoom worship was born the genie is out and will never go back in But in the face of the now acceptable force of contemporary narcissism who cares **How Much Should a Person Consume?** Ramachandra Guha,2006 Publisher description *Men Alone* Jopi Nyman,1997 This study examines masculinity and individualism in four American novels of the 1920s and 1930s usually regarded as belonging to the genre of hard boiled fiction The novels under study are *Red Harvest* by Dashiell Hammett *The Postman Always Rings Twice* by James M Cain *They Shoot Horses Don t They* by Horace McCoy and *To Have and Have Not* by Ernest Hemingway In this first full length study of gender in hard boiled fiction the genre is discussed as a representation of the ideologies of masculinity and individualism Hard boiled fiction is located in its historical and cultural context and it is argued that the genre with its explicit emphasis on masculinity and masculine virtues attempts to reaffirm a masculine order The study argues that this emphasis is a counter reaction to more general changes in the gender relations of the period Indeed hard boiled fiction is argued to be an attempt to reconstruct a masculine identity based on anti modern values generally accepted in the cultural context of the genre **Medicinal Plant Biotechnology** Reagan Knox,2019-06-21 Plant based medicines assume a critical part in all societies and have been fundamental in keeping up wellbeing and battling infections The distinguishing proof of dynamic standards and their sub atomic focuses from customary prescription gives a huge chance to sedate advancement Utilizing present day biotechnology plants with particular synthetic syntheses can be mass spread and hereditarily enhanced for the extraction of mass dynamic pharmaceuticals In spite of the fact that there has been noteworthy advance in the utilization of biotechnology utilizing tissue societies and hereditary change to research and modify pathways for the biosynthesis of target metabolites there are many difficulties associated with bringing plants from the lab to effective plug development This book shows the most recent advances in the improvement of restorative medications including points for example plant tissue societies optional metabolite generation metabolomics metabolic building bioinformatics and future biotechnological bearings This special review of plants and transgenic systems of extraordinary logical therapeutic and financial incentive for both industry and the scholarly community covers the entire range from cell culture methods by means

of hereditary designing and auxiliary item digestion up to the utilization of transgenic plants for the generation of bioactive mixes

The Struggle For Nature Jozet Keulartz, 2003-05-20 The Struggle for Nature outlines and examines the main aspects of current environmental philosophy including deep ecology social and political ecology eco feminism and eco anarchism It criticises the dependency on science of these philosophies and the social problems engendered by them The author argues for a post naturalistic turn in environmental philosophy The Struggle for Nature presents the most up to date arguments in environmental philosophy which will be valuable reading for students of applied philosophy environmental studies and geography
