Technological Change and Economic Performance Albert N. Link, Donald Siegel, 2003-02-20 Reviews of the literature on historical and theoretical developments of technology and economic growth including productivity measures technical knowledge technological spillovers and stock market reactions to technology investment *Innovation and Economic Crisis* Daniele Archibugi, Andrea Filippetti, 2013-03-01 The recent financial and economic crisis has spurred a lot of interest among scholars and public audience Strangely enough the impact of the crisis on innovation has been largely underestimated This books can be regarded as a complementary reading for those interested in the effect of the crisis with a particular focus on Europe *Public Policy for Regional Development* Jorge Martinez-Vazquez, Francois Vaillancourt, 2008-05-20 This book addresses the question of the best possible uses of public funds and the most effective strategies for regional development focusing on the develop of human capital and the methodology of formulating regional policy **Knowledge Economies** Wilfred Dolfsma, 2008-09-03 Chapter 1 Introduction chapter 2 Knowledge and learning chapter 3 Creating knowledge Transfer exchange and gifts chapter 4 Development of economic knowledge Paradigms and new ideas chapter 5 Knowledge exchange in networks within firm analysis chapter 6 Knowledge exchange between firms economic geography of high tech firms chapter 7 The knowledge base of an economy What contributes to its entropy chapter 8 A dynamic welfare perspective for the knowledge economy chapter 9 Concluding remarks Learning, Capability Building and Innovation for Development G. Dutrénit, K. Lee, R. Nelson, L. Soete, A. Vera-Cruz, 2013-08-22 Today a large number of scholars studying development understand this process as involving learning and capability building Capability building is an active not a passive process It requires a purposeful effort from the learner s side with support and commitment on allocation of time and resources toward learning activities This process implies the possibility of failure as well as success as we also learn from failures A global cast of academics and policy makers examines economic development as a process of learning and technological accumulation showing how economic development is a process involving creative destruction While markets and market competition play major roles in structuring the development process non market institutions and government policies matter *Public Goods, Public Gains* Albert N. Link, John T. Scott, 2011-01-27 In Public Goods Public Gains Link and Scott discuss the systematic application of alternative evaluation methods to estimate the social benefits of publicly financed research and development R D The authors argue that economic theory should be the guiding criterion for any method of program evaluation because it focuses attention on the value and the opportunity costs of the program The evaluation methods discussed and illustrated are both economics and for comparison non economics based The book is motivated by four foundation chapters that discuss government s role in innovation from the perspective of economic theory review public accountability issues from both a constitutional and an historical perspective overview systematic approaches to program evaluation and describe the evaluation metrics typically used Four case studies illustrate the four alternative

evaluation approaches discussed These case studies are for the U S Advanced Technology Program s intramural research awards program the U S National Institute of Standards and Technology s research on wavelength references for optical fiber communications the U S Malcolm Baldrige National Quality Award and the Advanced Technology Program s focused program on the integration of manufacturing applications

Forthcoming Books

Rose Arny,2003-04 *Innovation, Technology and Hypercompetition* Hans-Werner Gottinger,2013-01-11 In an increasingly technologically led century the striking pattern emerging in firms innovative activities is their competition for a technological leadership position in situations best described as races A race is an interactive pattern characterized by firms constantly trying to get ahead of their rivals or trying not to fall too far behind In high technology industries where customers are willing to pay a premium for advanced technology leadership translates into increasing returns in the market through positive network externalities Innovation Technology and Hypercompetition synthesizes and unifies the various methodological approaches for the industry specific analysis of fast changing competitive positions driven by relentless innovation hypercompetition Game theoretic and agent based tools are applied to competitive industries in various market settings and in a global context Rivalry of this sort is seen to extend to the catching up and forging ahead of regions and nations In this revealing volume Hans Werner Gottinger brings his expert eye to this issue and employs various tools from economic theory to attain this end He provides the behavioural foundations for what is driving globalization in this a volume

of interest to academic economists legal experts management consultants and practitioners alike *The Economics of Knowledge, Innovation and Systemic Technology Policy* Francesco Crespi, Francesco Quatraro, 2015-05-15 There is wide consensus on the importance of knowledge for economic growth and local development patterns This book proposes a view of knowledge as a collective systemic and evolutionary process that enables agents and social systems to overcome the challenges of the limits to growth It brings together new conceptual and empirical contributions analysing the relationship between demand and supply factors and the rate and direction of technological change It also examines the different elements that compose innovation systems The Economics of Knowledge Innovation and Systemic Technology Policy provides the background for the development of an integrated framework for the analysis of systemic policy instruments and their mutual interaction the socio political and economic conditions of the surrounding environment These aspects have long been neglected in innovation policy as policymakers academics and the business community have mostly emphasized the benefits of supply side strategies However a better understanding of innovation policies grafted on a complexity based approach calls for the appreciation of the mutual interactions between both supply and demand aspects and it is likely to improve the actual design of policy measures This book will help readers to understand the foundations and working of demand driven innovation policies by stressing the importance of competent and smart demand

Governmental Forms and Economic Development Maria Brouwer, 2016-08-11 This book investigates the performance of economic development under different forms of government ranging from autocratic states to liberal democracies Starting with a critical review of the literature on social and economic development including the works of Frank Knight Max Weber Joseph Schumpeter and Peter Drucker it offers a historical analysis of the expansion of markets cities and trade in medieval Europe and the monopolization of trade by the emerging European nation states The book also presents a case study on the rise and decline of the Dutch Republic discusses topics such as the disadvantages of the central direction of economic organizations and federal decentralization as a model for promoting growth and investment and illustrates how successful companies like Semco and Google are building on centuries old management principles

Technical Change and Economic Growth George M. Public Support of

Innovation in Entrepreneurial Firms Albert N. Link, 2013-12-27 Based on data collected by the National Research Council of the National Academies of the United States on projects funded through the SBIR program these papers form a comprehensive foundation that will serve as a critical guide to the topic for both Good Growth and Governance in Africa Akbar Noman, 2012 This volume reflects the highlights of their deliberations *Handbook on the Economic Complexity of Technological Change* Cristiano Antonelli, 2011-01-01 This comprehensive and innovative Handbook applies the tools of the economics of complexity to analyse the causes and effects of technological and structural change It grafts the intuitions of the economics of complexity into the tradition of analysis based upon the Schumpeterian and Marshallian legacies The Handbook elaborates the notion of innovation as an emerging property of the organized complexity of an economic system and provides the basic tools to understand the recursive dynamics between the emergence of innovation and the unfolding of organized complexity In so doing it highlights the role of organizational thinking in explaining the introduction of innovations and the dynamics of structural change With a new methodological approach to the economics of technological change this wide ranging volume will become the standard reference for postgraduates academics and practitioners in the fields of evolutionary economics complexity economics and the economics of innovation **ICT-Driven Economic and Financial Development** Ewa Lechman, Adam Marszk, 2019-09-04 ICT Driven Economic and Financial Development Analyses of European Countries demonstrates the effects of ICT diffusion on economic social and financial development by examining their impact on the structure and dynamics of national economies It provides the insight into shifts observed in labour markets international trade activities productivity factors education and use of innovative financial products It combines empirical analyses and data sources stretching back to 1990 make it an important contribution to understanding the effects of ICT diffusion on economic and financial development The book answers questions such as how will national and regional economies react to upcoming ICT developments and growing usage and what is the magnitude of impact of new information and communication technologies on various aspects of social and economic life Demonstrates the process of ICT spread across European countries Analyzes the value of ICTs from both economic and social perspective Examines structural changes in financial markets caused by ICTs implementation *The Challenges of Technology and Economic Catch-up in Emerging Economies* Jeong-Dong Lee, Keun Lee, Dirk Meissner, Slavo Radosevic, Nicholas Vonortas, 2021-06-24 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations Innovation is a pivotal driving force behind economic growth Technological capability deepens and diversifies industrial activity which fundamentally enhances growth potential Consequently failure to build effective technological capability can lead to slow long term economic growth This book synthesizes and interprets existing knowledge on technology upgrading failures in order to better understand the challenges of technology upgrading in emerging economies The objective is to bring together diverse evidence on three

major dimensions of technology upgrading paths of technology upgrading structural changes in the nature of technology upgrading and the issues of technology transfer and technology upgrading Knowledge on these three dimensions is synthesized at the firm sector and macro levels across different countries and world macroregions Compared to the challenges and uncertainties facing emerging economies our understanding of technology upgrading is sparse unsystematic and scattered The recent growth slowdown in many emerging economies often known as the middle income trap has reinforced the importance of understanding the technology upgrading challenges they experience While our understanding of these issues from the 1980s and 1990s is relatively more systematised the more recent changes that took place during the globalization and proliferation of global value chains and the effects of the 2008 financial crisis have not been explored and compared synthetically The current effects of COVID 19 geopolitical struggles and the growing concern around environmental sustainability add significant complexity to an already problematic situation The time is ripe to take stock of our existing knowledge on processes of technology upgrading in emerging economies and make further inroads in research on this crucial issue *Technological Change and Industrial Transformation* Vicky Xiaoyan Long,Magnus

Holmén,2021-08-18 Industrial transformation is a research and teaching field with a focus on the phenomenon and mechanisms of industrial development and renewal It concerns changes in economic activities caused by innovation competition and collaboration and has a rich heritage of evolutionary economics institutional economics industrial dynamics technology history and innovation studies It borrows concepts and models from the social sciences sociology history political sciences business management economics behavioural sciences and also from technology and engineering studies In this book the authors present the key theories frameworks and concepts of industrial transformation and use empirical cases to describe and explain the causes processes and outcomes of transformation in the context of digitalization and sustainability They stress that industrial transformation consists both of Darwinian survival of the fittest selection and of intentional pursuits of innovation and of industrial capabilities creation The work argues that managing the global trends of transformation is not only about new technology and innovation existing institutional settings and dynamic interactions between technological change organizational adaptation and economic activities also have a profound impact on future trajectories The areas under investigation are of great relevance for strategic management decisions and industrial and technology policies and understanding the mechanisms underlying transformation and sustainable growth
