Materialities of Age and Ageing: Concepts of a Material

Gerontology Grit Höppner, Monika Urban, 2019-06-18 In gerontological research the understanding of age and ageing changed in the last decade Biologic determined explanations no longer prevail in this research field Instead ideas of social constructivism are frequently used These ideas define the state of age and the process of ageing as social constructions steeping ageing in social and cultural assumptions ascriptions and expectations From a social constructivist perspective age and ageing are not just identified as dependency deficit and need for care as it was foremost accelerated from a biological perspective but with the life course and thus with individual lifestyles experiences attitudes and practices as well as institutional and economic structures A prominent social constructivist concept is doing age Similar to doing gender the concept of doing age assumes age as taking place in the form of a social praxis within everyday life interactions between people and thus in performances embedded in discourses through which social hierarchies and ideals proceed Despite the paradigm shift that social constructivist concepts enable in gerontological thinking they reveal their blind spot when it comes to the materiality of ageing and thus to fleshy sensual experiences human and non human ontologies and agencies Addressing these materialities of ageing brings up its own critique on definitions of ageing bodies and material environments This framing does not presume that age and ageing are solely products of human to human interactions or those of formative environments or of discourses Rather humans non humans and discourses become essential parts of ageing processes Such a material framing enables us new insights into forms of age and ageing and thus offers an opportunity for scholars to engage

critically with materialities of age and ageing This eBook explores theoretical methodological and empirical concepts of such a Material Gerontology Enabling Innovation Sabina Jeschke, Ingrid Isenhardt, Frank Hees, Sven Trantow, 2011-10-08 The capability to innovate in an on going manner is emerging as a decisive key factor in today s world of business and work The ability to stay competitive is becoming identical with the ability to innovate This book originated from the research and development project International Monitoring and outlines the topic of innovative capability from a practice oriented angle Contributions of German and international experts offer an enlightening glimpse behind the scenes of innovations The central issue is not the description of features of successful innovation processes or how innovations can be efficiently controlled and managed but under which conditions they can emerge in the first place In what way can individuals organizations networks and societies be enabled to continuously induce innovations **A Guide to Teaching Practice** Louis Cohen, Lawrence Manion, Keith Morrison, Dominic Wyse, 2010-06-17 A Guide to Teaching Practice is the major standard text for all students on initial teacher training courses in the UK Authoritative yet accessible it covers the important basic skills and issues that students need to consider during their practice such as planning classroom organization behaviour management and assessment The book s focus on the quality of teaching and learning and consideration of the latest regulations and guidelines ensures that it fits comfortably within TTA and OfSTED frameworks In addition comprehensively revised and fully updated this fifth edition features brand new chapters on the foundation stage legal issues learning and teaching and using ICT in the classroom as well as new material on numeracy literacy children s rights progress files and gifted and talented children This book is the most respected and widely used textbook for initial teacher training courses and will be an essential resource for any student teacher *UPSC CDS Topic Wise Previous Years' 2010-2020 Solved & Practice Questions eBook* Adda247 Publications, ADDA 247 is launching a complete and comprehensive eBook on UPSC CDS IMA INA AFA and CDS OTA The eeBook is updated as per the latest examination pattern and is suitable for UPSC CDS IMA INA AFA and UPSC CDS OTA Officer Training Academy The aim of this eeBook is to help students learn and understand the new pattern of recruitment exams which will help them to maximize their scores in the competitive examination The eBook has been prepared by experienced faculties subject matter experts and with the expertise of Adda247 keeping the new pattern and challenges of competitive exams in mind Salient Features of the eeBook 6000 Topic Wise Previous year Questions 2010 2020 2500 Practice Questions with Detailed Solutions 6 Practice Papers **Nordic Voices** ,2009-01-01 This volume represents the work of sixteen authors who all work at different universities and other academic institutions in the Nordic countries It provides insight into the diversity of research being conducted in the northernmost parts of Europe Although it would be incorrect to assert that research in this far away part of Europe represents something drastically different than that done in other parts of the world it would be equally incorrect to maintain that being at the outskirts on the cusp or on the periphery _ whichever way one wishes to describe the position of the Nordic countries in relation to the rest of the world

Latin American Women and Research Contributions to the IT Field
Negrón, Adriana Peña Pérez, Muñoz, Mirna, 2020-12-18 Although the effort to involve women in engineering has risen in recent years with the creation of new initiatives and the promotion of inclusion in technical disciplines the active participation of women in engineering professions is continuously lower than expected While the need for engineers appears to be constantly increasing women still do not fill most of this role and have a long way to go to even reach an equal split in the field This gender gap has a significant impact how women in the STEM fields are perceived as well as their experiences in their education and careers When it comes to Latin American women in IT their contribution to science can go unnoticed their participation levels in these fields are very low and they often occupy lower level positions than their male counterparts These issues need to be discussed and the experiences of women who work in the field must be shared Latin American Women and Research Contributions to the IT Field highlights the important role of Latin American women in IT by collecting and disseminating their frontier research contributions in order to provide more visibility and inspire greater participation of Latin American women within the major field of computer science With chapters contributed by female authors from eight Latin American and Caribbean countries the book provides a deep analysis of these women s trajectory paths to high quality theoretical and applied relevant research in computer science and IT While highlighting areas such as inclusivity and STEM education along with advancements and achievements in topics that include nonverbal interaction in virtual reality fuzzy logic applications in education and ant colony optimization this book is ideal for professionals academics students and researchers working in the fields of information technologies and computer science as well as those interested in gender and women s studies
