

The background of the book cover is a traditional Chinese woodblock-style illustration. It depicts a textile workshop or a domestic space where two women are engaged in weaving. One woman, wearing a green robe, is seated on the left, working on a large, complex wooden loom. Another woman, wearing a pink robe, is standing on the right, also working on a similar loom. The room has a high ceiling with a wooden lattice structure and a window with vertical bars. The floor is made of stone tiles. The overall style is reminiscent of traditional Chinese art.

An Alternative History of Bicycles and Motorcycles Steven E. Alford, Suzanne Ferriss, 2016-04-06 An Alternative History of Bicycles and Motorcycles Two Wheeled Transportation and Material Culture accounts for the nineteenth century creation and development of two wheeled vehicles both human powered and motorized Specifically the book focuses on the period from 1885 which saw the appearance simultaneously of the Safety bicycle and the Einspur the first motorcycle to 1920 while exploring implications for later bicycling and motorcycling We argue that invention of these vehicles rather than the product of gifted individuals should be seen as the consequence of a number of historical economic cultural and political forces that intersect so unpredictably that the notion of a genius inventor is reductive The common evolutionary model of development from the bicycle to the motorcycle oversimplifies both the technology and its origins Stripping the vehicles of all their material and cultural associations such a model fails to advance our understanding of the devices their creators and their riders Taking a contemporary vehicle and tracing its lineage creates a false sense of evolutionary necessity in its creation and fails to account for the many possible developmental paths that were for whatever reason abandoned By contrast our book adopts a material culture approach a form of inquiry that stresses the connections between artifacts and social relations We consider

not simply the bicycle and motorcycle as material objects but focus also on the complex socio political and economic convergences that produced the materials materials that in turn themselves shaped the vehicles appearance function and adoption by riders *Saltpeter* David Cressy,2013-01-10 The story of the science the technology the politics and the military applications of saltpeter the vital but mysterious substance that governments from the Tudors to the Victorians regarded as an inestimable treasure **A Companion to the Philosophy of Technology** Jan Kyrre Berg Olsen,Stig Andur Pedersen,Vincent F. Hendricks,2012-10-01 Drawing on essays from leading international and multi disciplinary scholars A Companion to the Philosophy of Technology is the first comprehensive and authoritative reference source to cover the key issues of technology s impact on society and our lives Presents the first complete authoritative reference work in the field Organized thematically for use both as a full introduction to the field or an encyclopedic reference Draws on original essays from leading interdisciplinary scholars Features the most up to date and cutting edge research in the interdisciplinary fields of philosophy technology and their broader intellectual environments *The Ethics of Technology* Sven Ove Hansson,2017-03-08 Our daily lives are affected by new technologies at an ever increasing rate It is becoming more and more important to assess future technologies from an ethical point of view and to do this before they are introduced on a massive scale Such assessments require systematic use of many different kinds of knowledge In this important new book an international team of leading experts in the field provides the first comprehensive treatment of the methods available for ethical assessments of technologies and their social introduction The book explores how information from empirical research can be used in ethical analyses of technology and includes chapters showing how ethical analysis can shed light on topics such as privacy risk sustainability dual use gender issues justice international technology transfer and the responsibility of engineers It provides an invaluable resource for students in the philosophy and ethics of technology science and technology studies applied ethics bioethics business ethics and the ethics of computing **What is Global History?** Pamela Kyle Crossley,2008 Global and world history address the deep structural changes that have shaped human experience Many are material related to environmental and climatic alteration to the domestication of livestock and development of agriculture to technology to disease and to variations in human immunity reproduction and physiology Others are social and cultural touching upon issues of migration trade language development and differentiation institutions of enslavement and of freedom traditions of marriage and child rearing the emergence of large scale political organization from early kingdoms to vast empires republics and federations and the management of war and peace To deal with such challenging issues global historians draw upon new techniques of analysis and comparison But they also continue venerable traditions inherited from the earliest civilizations of narrating the past on the most comprehensive and significant scale possible This book examines the long search for an integrated human story and particularly the points at which rapid changes of philosophy and perspective in the twentieth century transformed the historical disciplines It provides the perfect introduction to global

history for students and scholars alike *Between the Middle Ages and Modernity* Charles H. Parker, Jerry H. Bentley, 2007 This groundbreaking book examines the complex relationships between individuals and communities in the profound transitions of the early modern period Taking a global and comparative approach to historical issues the distinguished contributors show that individual and commun **The Elusive Transformation** Eugene B. Skolnikoff, 1994-08-22 Eugene Skolnikoff treats the roles of science and technology across the entire range of relations among nations including security and economic issues environmental questions international economic competitiveness the spread of weapons technology the demise of communism the new content of dependency relations and the demanding new problems of national and international governance He shows how the structure and operation of the scientific and technological enterprises have interacted with international affairs to lead to the dramatic evolution of world politics experienced in this century particularly after World War II **Hubris and Hybrids** Mikael Hård, Andrew Jamison, 2013-09-13 Human societies have not always taken on new technology in appropriate ways Innovations are double edged swords that transform relationships among people as well as between human societies and the natural world Only through successful cultural appropriation can we manage to control the hubris that is fundamental to the innovative enterprising human spirit and only by becoming hybrids combining the human and the technological will we be able to make effective use of our scientific and technological achievements This broad cultural history of technology and science provides a range of stories and reflections about the past discussing areas such as film industrial design and alternative environmental technologies and including not only European and North American but also Asian examples to help resolve the contradictions of contemporary high tech civilization The Global Imperative Robert P Clark, 2018-02-12 Robert Clark delves into 100 millennia of human history to create a unified and consistent explanation for humankind's inner need to spread itself across the globe He examines key events from different eras such as the voyages of the Chinese treasure fleet the shaping of the Aztec's trade system in MesoAmerica the role of steam powered transport in the supply of an English city the rise of the gas powered engine and the digitization of information in the computer age melding them together to form a framework for understanding the process of globalization Drawing on a variety of academic disciplines including the physical sciences biology anthropology geography economics political science sociology and demography Clark reveals the spread of humans and their cultures to be part of an ongoing struggle to supply the energy needs of an increasingly large and complex society Entropy and thermodynamics terms often ignored or misunderstood by social science students clearly frame a fascinating vision of humans inherent tendency toward a globalized world Although human expansion has drawn increasing attention in the last several decades as this tumultuous century has progressed Clark shows that the process of globalization is not a recent concept From the very roots of the species humankind has been driven by a range of internal and external factors to expand in order to survive the increasing complexity of human civilization **The Early Muslim Tradition of Dream Interpretation** John C.

Lamoreaux,2002-05-02 Explores dream interpretation among the early Muslims who saw dreams as a type of prophecy
