Telecommunications Law and Regulation in Nigeria Uchenna Jerome Orji, 2018-12-19 The Nigerian telecommunications industry has continued to grow in a phenomenal manner following market liberalization reforms that commenced in the 1990s As of 2017 the telecommunications industry was one of the fastest growing economic sectors in Nigeria and the fourth largest contributor to the country's Gross Domestic Product The telecommunications industry however remains a highly technical and naturally dynamic industry that has not been a usual area for legal research in developing countries such as Nigeria This book bridges that gap in knowledge by providing an analysis of the legal and policy

instruments that regulate the industry It comprises eleven chapters that discuss the historical evolution of telecommunications and its regulation the development of the Nigerian telecommunications industry from 1886 to 2017 the legal basis for the regulation of the industry the licensing and duties of service providers the regulation of network infrastructure the protection of consumers the regulation of competition interconnection universal access and environmental protection and the resolution of industry disputes This book will be useful to policy makers legislators regulators lawyers law students investors operators and consumers as well as any person interested in the Nigerian telecommunications industry

The Electronic Communications Code and Property Law Falcon Chambers, 2018-10-11 Life now without access to electronic telecommunications would be regarded as highly unsatisfactory by most of the UK population Such ready access would not have been achieved without methodical and ultimately enforceable means of access to the land on which to install the infrastructure necessary to support the development of an electronic communications network Successive governments have made such access a priority regarding it as a principle that no person should unreasonably be denied access to an electronic communications network or electronic communications services The enactment of the Telecommunications Act 1984 and its revision by the Communications Act in 2003 have played their role in the provision of an extensive electronic infrastructure in the UK while their reshaping by means of the Digital Economy Act 2017 will continue that process Throughout that process a little publicised series of struggles has taken place between telecommunications operators and landowners as they seek to interpret the Electronic Communications Code by which their rights and obligations have been regulated This book describes the problems that accompanied the Old Code which will continue to regulate existing installations and agreements and the intended solutions under the New Code The eminent team of authors explain the background provisions and operation of the

old code and the new one providing practical and jargon free guidance throughout It is sure to become the reference on this topic and is intended as a guide for telecommunications operators land owners and of course for their advisers in the legal and surveying professions All members of Falcon Chambers comprising nine Queen s Counsel and 30 junior barristers specialise in property law and allied topics including the various incarnations of the Electronic Communications Code Members of Falcon Chambers including all the authors of this new work have for many years lectured and written widely on the code and have appeared acting for both operators and landowners in many of the few reported cases on the subject of the interface between property law and the code including for example *Geo Networks Ltd v The Bridgewater Canal Co Ltd* 2010 *Geo Networks Ltd v The Bridgewater Canal Co Ltd* 2011 *Crest Nicholson Operations Ltd v Arqiva Services Ltd* 2015 *Brophy v Vodafone Ltd* 2017 *Principles of Enterprise Law* Ewan McGaughey, 2022-09-01 Major enterprises shape our lives in countless ways big tech and surveillance media that affect democratic debate algorithms that influence online shopping transport to work and home energy and agriculture corporations that drive climate damage and public services that provide our education health water and housing The twentieth century experienced swings between private and public ownership between capitalism and socialism without any settled principled outcome and without settling major questions of how enterprises should be financed governed and the rights we have in them This book s main question is are there principles of enterprise law and if they are missing what principles of enterprise law should there be *Principles of Enterprise Law* gives a functional account of the general enterprise laws of companies investment labour competition and insolvency before moving into specific enterprises from universities to the military It is an original guide to our economic constitution and human rights

European Telecommunications Liberalisation Kjell A. Eliassen, Marit Sjøvaag Nfa, Marit Sjøvaag, 2013-03-04 This book examines the process and consequences of telecommunications liberalisation in the context of an ever closer European Union The creation of a single market for telecommunications and of a wider European single market mirror one another Telecommunications are also something of a test case for the privatisation process as this sector has traditionally been a state monopoly The volume approaches the European experience from three angles the politics of regulation and the process

of liberalisation in the EU including case studies of the UK France and Germany increasing global economic interdependence makes international comparisons essential and the volume compares the EU experience with that of the Czech Republic Israel and Thailand the consequences of technology and continuous innovation

The Legitimacy and Responsiveness of Industry Rule-making Karen Lee, 2018-09-06 Rule making is no longer an activity undertaken exclusively by public actors Private actors are increasingly allowed by legislatures and regulatory bodies to take part in and in some cases assume responsibility for the formation of legally binding rules for example in the US UK Australia and the EU Departing from traditional forms of rule making by involving private actors may enhance the ability of regulatory systems to achieve social goals as regulatory scholars argue However because private actors are permitted to act in their own best interests their involvement also raises doubts about the legitimacy of the underlying rule making processes and the rules that are formulated The principal aim of this book is to highlight that the tension between the responsiveness that leading international regulatory scholars advocate in order to improve regulatory effectiveness and the law and its formal substantive procedural and institutional values is not as great as may first appear Drawing on three in depth case studies of the experience of the Australian telecommunications industry with self regulatory rule making a form of rule making that bears the hallmarks of responsive regulation democratic experimentalism smart regulation and other strategies of proceduralization it is argued that industry rule making can as a matter of practice be responsive and legitimate at the same time In doing so the book formulates and applies criteria against which industry rule making should be evaluated and identifies a number of indicia that point to when industry rule making is likely to be simultaneously legitimate and responsive

Margin Squeeze in the Electronic Communications Sector Anna Renata Pisarkiewicz, 2018-06-22 Margin squeeze is a form of abuse of a dominant position in which a vertically integrated company reduces the margin between the price charged to competitors and the price charged to consumers which can have the effect of excluding a competitor from the market In the decade or so since the liberalisation of network industries margin squeeze has become a major source of concern among competition authorities and courts particularly pronounced in the electronic communications sector Because some of the adopted decisions show significant inconsistencies in approach and legal certainty remains elusive in this area this book which provides an extremely thorough analysis is both timely and of great practical value The author provides an in depth examination of margin squeeze allegations in the electronic communications sector with a view to developing a more advanced and comprehensive analysis of principles which should guide ex post assessment of margin squeeze Issues and topics covered include scope of intervention in margin squeeze cases both for national regulatory and national competition authorities conditions for sanctioning margin squeeze under Article 102 methodological and practical difficulties in identifying a margin squeeze methodology employed in margin squeeze cases and its regulatory aspects assessment of the ability and incentives of regulated firms to engage in a margin squeeze and situations when competition law is used to

address the deficits of regulation and regulatory failures. It also includes a critical comparison of the vertical foreclosure analysis undertaken in margin squeeze cases with the approach adopted in the EU Non Horizontal Merger Guidelines. Throughout the analysis, margin squeeze treatment in the European Union and its Member States is examined in light of the diverging approach adopted by the US Supreme Court. The increasing complexity of the electronic communications market can only further confound an already complex assessment of price squeezes and one can expect that claims of anticompetitive margin squeeze in liberalised network industries will continue to be high on the enforcement agenda of competition authorities for years to come. In light of the need for a coherent or at least predictable sentencing policy to provide relative legal certainty, the research in this book proves invaluable. The analysis and conclusions discussed in this book will be welcomed by policymakers, regulators and lawyers working in the areas of competition law and electronic communications law.

Making Policy in Europe Svein S Andersen, Kjell A Eliassen, 2001-01-26. This Second Edition of *Making Policy in Europe* is fully revised and expanded to provide the most up to date introduction to the study of policymaking in the European Union (EU). The first part of the book introduces the different perspectives to study of the EU as a political system and provides a framework for the study of the main actors and institutions in the decision making process from transnational lobbying within Brussels to the implementation of EU law in national member states. Part two introduces each of the main sectoral policy areas. The common market is introduced and reviewed before students are provided with detailed studies of policies and policy making in telecommunications, the environment, energy, education, immigration and policing. In each case, the complex interaction between different interests and actors at different levels in the EU apparatus is richly illustrated and the future prospects for further integration fully examined. The final part of the book looks at the future economic and political structure of the EU and the direction of contemporary studies of the EU and European integration. A completely new chapter reviews European monetary union, another looks at the important enlargement question and finally the editors review the wider implications for Europe and the EU political system. This book will be essential reading for another generation of students of the EU.

The Interplay between European and National Competition Law after Regulation 1/2003 Lúcio Tomé Feteira, 2015-12-08. If we can speak of the European Community's economic constitution, we can assert that competition rules together with free movement rules form its core. Notably, implementation of the competition rules enshrined in Articles 81 and 82 EC changed radically with the enactment of Regulation 1/2003, which in effect dispensed with mandatory prior notifications and allowed national authorities to apply Article 101(3) TFEU directly. Given that national legislations perceive certain types of unilateral conduct, even if adopted by a non-dominant undertaking, as a potential source of anticompetitive effects, an important question concerns the leeway enjoyed by national authorities under

the exception to the convergence rule in Article 3 2 of Regulation 1 2003 and the consequent effect on both legal practice and policy issues In this lucidly argued book focusing on national competition provisions in Germany France Italy and the United Kingdom that deal with such conduct the author provides a detailed examination of how such considerations as the following are affected by Regulation 1 2003 prohibition of abuse of economic dependence or superior bargaining power the particular susceptibility of long term contracts prohibition of resale at a loss or below cost prohibition of boycott unlawful pressures threats and other coercive tactics adopted by undertakings and the role of unfair competition law The analysis follows a functional method of comparative legal analysis reviewing the most relevant norms in the selected jurisdictions particularly in what concerns their goals and function in the context of their respective legal systems Special attention is paid to two specific sectors the motor vehicle and the retailing industries which have most often triggered relevant legislation and case law in the jurisdictions covered Legal scholarship in the field is also drawn upon In its clarification of the meaning of Regulation 1 2003 this book allows practitioners to fully grasp its scope The author's thorough masterful analysis of the statutory framework of Article 3 of the regulation also reveals the variety of reasons why different Member States have different competition policies on the scope of the exception to the rule of convergence and in this way provides lawyers policymakers and academics with welcome insights on how major EU jurisdictions apply European competition law

Economic Efficiency Ben Van Rompuy, 2012-08-01 Over the past decade we have witnessed an apparent convergence of views among competition agency officials in the European Union and the United States on the appropriate goals of competition law enforcement Antitrust policy it is now suggested should focus on enhancing economic efficiency which we are to believe will promote consumer welfare Recent EU Commission Guidelines on the application of Article 101 TFEU appear to banish considerations that cannot be construed as having an economic efficiency value such as the environment cultural policy employment public health and consumer protection from the application of Article 101 TFEU Arguing that the professed adoption of an exclusive efficiency approach to Article 101 TFEU does not preclude but rather obfuscates the role of non efficiency considerations the author of this timely contribution accomplishes the following objectives traces the genesis of the shift to an efficiency orientation in EU and US antitrust policy and dispels several ingrained misconceptions that underpin it demonstrates the close interrelationship between evolving images of the purpose of antitrust the development of related enforcement norms and enforcement output provides in depth analyses of a number of analytically rich cases in the audiovisual sector and particularly those related to sports rights and explores what the role of non efficiency considerations in the application of Article 101 TFEU could and should be under the modernized enforcement regime

Patent Settlements in the Pharmaceutical Industry under US Antitrust and EU Competition Law Amalia Athanasiadou, 2018-08-14 Reverse payment settlements or pay for delay agreements between originators and generic drug manufacturers create heated debates regarding the balance between competition and intellectual property law These

settlements touch upon sensitive issues such as timely generic entry and access to affordable pharmaceuticals and also the need to preserve innovation incentives for originators and to strengthen the pipeline of life saving pharmaceuticals This book is one of the first to critically and comparatively analyse how such patent settlements and various other strategies employed by the pharmaceutical industry are scrutinised by both United States US and European courts and enforcement authorities and to discuss the applicable legal tests and the main criteria used for their assessment The book s ultimate objective is to provide guidance to the pharmaceutical industry regarding the types of patent settlements strategies and conduct which may be problematic from US antitrust and European Union EU competition law perspectives and to assist practitioners in structuring settlements which are both efficient and compliant To this end an exhaustive legal analysis of some of the most controversial issues regarding pharmaceutical patent settlements is provided including the lengthy split among US Circuit Courts on the issue of pay for delay settlements its resolution by the US Supreme Court in *FTC v Actavis* and subsequent jurisprudence the decision of *Lundbeck v Commission* by the European General Court and the *Servier* decision of the European Commission the *Roche Novartis* decision of the European Court of Justice and the most important decisions by National Competition Authorities on pharma patent settlements in the EU an overview of other types of strategies such as product hopping and product reformulations no authorised generic commitments problematic side deals mechanisms affecting generic substitution the rejection of the scope of the patent test in both the US and the EU and the balancing of patent law and antitrust law considerations in the prevailing applicable tests the benefits of settlements and the main criteria for assessing their legitimacy under US antitrust and EU competition law The analysis provides concrete examples of both illegitimate and legitimate settlements and strategies emphasising on conduct that falls within a grey zone and on the circumstances and criteria under which such conduct could be deemed problematic from an antitrust perspective This book will serve as a valuable guide for pharmaceutical companies wishing to minimise the risk of engaging in conduct that could potentially infringe US antitrust and EU competition law It further aims to save courts and enforcement agencies and also practitioners and academics considerable time and resources by providing an exhaustive analysis of the relevant caselaw with the ultimate goal to increase legal certainty on the most controversial aspects of patent settlements in the pharmaceutical industry
