

Telephone Directory System C++ Project

Telephone directory is a simple C++ project. It uses very simple operations to make up the whole project; these include adding, deleting, searching, listing and modifying records.

The features of telephone directory system are mainly related to adding, listing, searching, modifying and deleting telephone directory-related records.

The information contained in the telephone directory records are the name, phone number and address of the person whose record is entered in the telephone directory system project. So, the telephone directory operations users can perform in this project are:

- Add telephone record
- Show records
- Modify record
- Search telephone records
- Delete record

Before displaying the above operations, the system must ask the user to insert the correct password to display the operations, the default password for the system is "tel123", if the inserted password was invalid you should display "invalid password, re-enter" message for the user, the user will have three invalid trials only, after that the system will exit.
