Multiparty Democracy in Zimbabwe Aaron Rwodzi, 2024-03-26 This book provides a comprehensive account of the tumultuous political landscape of Zimbabwe Delving into historical and contemporary perspectives the author analyses the relationship between the ruling ZANU PF party and the opposition exposing the pervasive influence of foreign powers and their regime change agendas Amidst western imposed economic sanctions the book examines how political opposition has struggled to maintain its footing in the face of ZANU PF's rhetoric on preserving the nation's sovereignty Drawing on the powerful theoretical frameworks of Gramsci's hegemony theory and instrumentalism the book dissects the constraints on multiparty democracy under ZANU PF's rule From the party's manipulation of liberation narratives to the subtle intricacies of Mugabeism a violent and ideological stronghold the author unveils the tactics employed to maintain power The chapters uncover the pivotal role played by the military throughout Zimbabwe's history from the days of the liberation struggle to the

shocking events of 2017 when Mugabe's grip on power was diminished by the very force that had propped him up for decades the author reveals how the military's involvement has thwarted opposition players attempts to claim power Boldly challenging the notion that constraints solely rest on ZANU PF this book calls attention to the shortcomings of opposition parties in navigating Zimbabwe's treacherous political landscape Using compelling evidence and unparalleled analysis the book is an essential read for those seeking to understand the intricate web of power manipulation and struggle that has defined Zimbabwe's political journey *From African Peer Review Mechanisms to African Queer Review Mechanisms?* Artwell Nhemachena, Victor Warikandwa, 2019-04-22 Tracing recent bouts of globalised Mugabephobia to Robert Mugabe's refusal to be neoimperially penetrated this book juxtaposes economic liberalisation with the mounting liberalisation of African orifices Reading land repossession and economic structural adjustment programmes together with what they call neoimperial structural adjustment of African orifices the authors argue that there has been liberalisation of African orifices in a context where Africans are ironically prevented from repossessing their material resources Juxtaposing recent bouts of Mugabephobia with discourses on homophobia the book asks why empire prefers liberalising African orifices rather than attending to African demands for restitution restoration and reparations Noting that empire opposes African sovereignty autonomy and centralisation of power while paradoxically promoting transnational corporations centralisation of power over African economies the book challenges contemporary discourses about shared sovereignty distributed governance heterarchy heteronomy and ontology Arguing that colonialists similarly denied Africans of their human essence the tome problematises queer sexualities homosexuality ecosexuality cybersexuality and humanoid robotic sexuality all of which complicate supposedly fundamental distinctions between human beings and animals and machines Provocatively questioning queer sexuality and liberalised orifices that serve to divert African attention from the more serious unfinished business of repossessing material resources the book insightfully compares Robert Gabriel Mugabe Thomas Sankara and Julius Kambarage Nyerere who emphasised the imperatives of African autonomy ownership control and sovereignty over natural resources Observing Africans interest in repossessing ownership and control over their resources the book wonders why so much queer international attention is focused on foisting queer sexuality while downplaying more burning issues of resource repossession human dignity equality and equity craved by Africans for whom life is not confined to sexuality With insights for scholars in sociology development studies law politics African studies anthropology transformation decolonisation and decoloniality the book argues that liberal democracy is a faade in a world that is actually ruled through criminocracy

Countless Blessings Barbara M. Cooper,2019-07-01 A study of pregnancy and childbirth customs in Niger and how it has both a high fertility rate and high rates of maternal and infant mortality How do women in Niger experience pregnancy and childbirth differently from women in the United States or Europe Barbara M Cooper sets out to understand childbirth in a country with the world s highest fertility rate and an alarmingly high rate of maternal and infant mortality Cooper shows how the environment slavery and abolition French military rule and the rapid expansion of Islam have all influenced childbirth and fertility in Niger from the nineteenth century to the present day She sketches a landscape where fear of infertility generates intense competition between communities ethnicities and co wives and creates a culture where concerns about infertility dominate concerns about overpopulation where illegitimate children are rejected and where the education of girls is sacrificed in the name of avoiding shame Given a medical system poorly adapted to women s needs a precarious economy and a political context where it is impossible to address sexuality openly Cooper discovers that it is little wonder that pregnancy and birth are a woman s greatest pride as well as a source of grave danger Beautifully written insightful and full of empathy A must read for anyone seeking to understand the damaging consequences of neglecting

The Green Revolution in the Global South R. Douglas Hurt, 2020-03-03 A synthesis of the agricultural history of the Green Revolution The Green Revolution was devised to increase agricultural production worldwide particularly in the developing world Agriculturalists employed anhydrous ammonia and other fertilizing agents mechanical tilling hybridized seeds pesticides herbicides and a multitude of other techniques to increase yields and feed a mushrooming human population that would otherwise suffer starvation as the world's food supply dwindled In *The Green Revolution in the Global South: Science, Politics, and Unintended Consequences* R. Douglas Hurt demonstrates that the Green Revolution did not turn out as neatly as scientists predicted When its methods and products were imported to places like Indonesia and Nigeria or even replicated indigenously the result was a tumultuous impact on a society's functioning A range of factors including cultural practices ethnic and religious barriers cost and availability of new technologies climate rainfall and aridity soil quality the scale of landholdings political policies and opportunism the rise of industrial farms civil unrest indigenous diseases and corruption entered into the Green Revolution calculus producing a series of unintended consequences that varied from place to place As the Green Revolution played out over time these consequences rippled throughout societies affecting environments economies political structures and countless human lives Analyzing change over time almost decade by decade Hurt shows that the Green Revolution was driven by the state as well as science Rather than acknowledge the vast problems with the Green Revolution or explore other models Hurt argues scientists and political leaders doubled down and repeated the same missteps in the name of humanity and food security In tracing the permutations of modern science's impact on international agricultural systems Hurt documents how beyond increasing yields the Green Revolution affected social orders politics and lifestyles in every place its methods were applied usually far more than once
