Zombie Stories For People With Short Attention Spans:

Zombie Stories for People with Short Attention Spans Shaun Phelps, Shaun Phelps MS, Kyle Clements, Dominique Divine, Tonia Brown, Rob Sacchetto, 2015-01-26 A collection of short disgusting and mentally disturbed zombie stories for the internet age Concise bittersweet and stomach churning This collection of disgusting horrifying and psychological thriller based zombie stories is the result of a challenge One night Kyle Clements and I decided we should write a novella We came up with the idea of writing stories based on a weekly challenge Each week we would send each other a single word for better or worse Regardless the word we had to write at least 1 000 words about the topic The stories that came out of the challenge are the most terrifying depraved sincere and utterly unreadable works we could have hoped for The idea was further based on Edgar Allen Poe s recommendation that a short story should be read within a single sitting Given society s recent changes in attention span we realized 1 000 words in a single sitting would be the best most people could accomplish When I introduced the idea to my mother she was excited until she read the first story Then she said I liked your last work better When I sent the novella to our beta readers their responses were typically a mix between This is really great and I couldn t finish this story it was just too disgusting In the end I think we adequately accomplished our goal A challenging read that is both interesting and disgusting at once It is our hope that you will both enjoy this book and also hate it yet not demand a refund

The Anthropocene and the Undead Simon

Bacon,2022-03-22 The Anthropocene and the Undead describes how our experience of an increasingly erratic environment and the idea of the undead are more closely linked than the obvious zombie horde signaling the end of the world In fact as described here much of how we understand the anthropocene both conceptually and in practice involves undead entities from the past that will not die undead traumas that rise up and consume the world and undead temporalities that can never end Fifteen original essays by cultural and anthropological experts such as Kyle William Bishop Nils Bubandt Johan H glund and Steffen Hantke among others study the nature of humanity s ongoing complicated relationship to the environment via the concept of the undead In doing so The Anthropocene and the Undead sheds invaluable light on adjacent concepts such as the Capitalocene Necrocene Disanthropocene Post anthropocene and the Symbiocene to trace real and imagined trajectories of our more than human selves into undead and undying futures

Teaching Children to Love Nature Dueep Jyot Singh, John Davidson, 2018-03-31 Table of Contents Introduction A Healthy Outdoors Diet Planning Your Nature Diet Bird baths and bird houses Coconut Birdhouse A Little Bit of Dirt Kids and Water Conclusion Author Bio Publisher Introduction It is surprising that it had to take scientific researchers to tell a large number of parents out there that it is necessary for them to make sure that their children had a regular dose of sun fresh air water and oxygen in order to keep healthy When I saw this research which was very well publicized I blinked Were there people really in the world who needed scientific research to prove something which was self evident before they would take their families into the lap of nature It is then that I began to analyze the social lifestyles and trends being set for the younger generation with the elder generation as an example The elder generation the parents had begun living a hectic lifestyle where survival of the fittest especially on the financial front was paramount Thus bothering about rest and recuperation in the lap of nature began to take a backseat way back in the 90s This lapse also caused ever growing statistics in tension stress depression obesity a low immunity system vulnerability to a number of diseases Also children began growing up with underdeveloped cognitive

abilities and also physicals resilience because they had not learned about the beneficial qualities of Power N to help keep you healthy naturally and give you long term health benefits at the same time Also the parents are not to blame When a child was young if he had not been taught by his own parents to walk run jog explore go adventuring in the lap of nature you would not expect him to grow up deciding that he had better become a nature loving Wild Kid all of a sudden I have seen a large number of my city bred friends who would shudder at the idea of tiring themselves on nature hikes or go adventuring in woods you know all those insects and snakes and bugs and sabertooth tigers out there shudder shiver Reagan's Game R. Safley,2008 Until now you have not been asking the right questions Samuel You shouldn't wonder how I came here You should wonder why Reagan DuSaint and Sam Kent have always had a profitable working relationship Until he shows up in Kent's road Now Sam has to do what Reagan wants or Reagan will do the only thing he knows to do kill anything that stands between him and his quest Follow the young author on a monstrous road trip as Sam Kent races to write Reagan's Redemption Just don't make the mistake of getting in the way There have been scientific theories which propose that human mental function is simply a result of electrical impulse passing from cell to cell generating reaction which triggers perception and thought Some psychologists and psychiatrists say If one cannot see it hear it or touch taste or smell it it does not exist But others in these professions are certain the processes and products of the human mind go far beyond the nervous system to include the unexpected and the unexplainable This first time author presents possibilities reminiscent of Stephen King's early work You are given a look into the mind of a killer You are entertained as you seek to understand it You are kept rapt throughout this delightfully creepy and horrific plot until the end a real kicker Now you have it figured out or do you Dr Tom Michel psychologist ret **The Hungry Dead: Midnight and Escape from the Living Dead** John Russo,2013-10-01 Your book guided me through my first completed movie Quentin Tarantino on Scare Tactics From the Master of the Living Dead John Russo's brilliantly chilling screenplay for the 1968 groundbreaking Night of the Living Dead helped pave the way for the flesh eating spectacles that have thrilled zombie fans for three generations Here for the first time in one volume are two of the master's most gruesome and demented novels of gut wrenching mayhem Midnight First they captured small animals Then they moved on to bigger prey Now the backwoods family that slays together stays together for one last midnight snack a pair of unsuspecting travelers whose ritual torture and sacrifice will only intensify the demonic clan's cravings for more Yeah they're dead they're all messed up Escape From The Living Dead In an isolated roadside diner a desperate group of strangers barricade themselves against a ravenous horde of undead customers who crave something more than the early bird special They want flesh Human flesh With a side order of brains and stomach turning terror A Two for One Feast for Hungry Horror Fans An unrelieved orgy of sadism Variety on Night of the Living Dead **ADD Kaleidoscope** Joan Andrews,Denise Evelyn Davis,1997 This easily read and understood book will help teenagers and adults and successfully cope with their ADD in their personal lives as well as their academic work lives Equally important the authors describe in meaningful detail the

frequent complications that often mask ADD and interfere with successful treatment particularly violence and addictions The rich clinical illustrations and the practical advice address critical yet often neglected management issues such as interpersonal problems with significant others consideration and planning for further education and training and how to deal with the workplace
