Zimbabwe Elizabeth Mamukwa, Ronnie Lessem, Alexander Schieffer, 2016-05-23 **Integral Green Zimbabwe** An African

Phoenix Rising by Ronnie Lessem Alexander Schieffer and Liz Mamukwa is the first book in the Integral Green Society and Economy series a series which has three overarching aims The first aim is to link together two major movements of our time one philosophical the other practical The philosophical movement is towards what many today are calling an integral age while the practical is the green movement duly aligned with that of sustainable development The second is to blend together elements of nature and community culture and spirituality science and technology politics and economics thus serving to bring about an integral green vision albeit with a focus on business and economics As such the authors transcend the limitations to sustainable development and environmental economics which are overly ecological if not also technological in orientation and exclude social and cultural elements Thirdly this particular volume focuses specifically on Zimbabwe as well as Southern Africa drawing on the particular issues and capacities that this country and region represents The emphasis on Zimbabwe and Southern Africa transpired not only because two of the editors Lessem and Mamukwa are Zimbabwean in origin but because Zimbabwe is today like a phoenix rising from the ashes and has the opportunity to recreate itself anew

Teaching Secondary Mathematics as if the Planet Matters Alf Coles, Richard Barwell, Tony Cotton, Jan Winter, Laurinda Brown, 2013-07-18 This book moves us beyond a theoretical pondering of the issues and makes concrete suggestions for teachers and students for how things can be different in mathematics classrooms This is long overdue Peter Gates University of Nottingham Teaching Mathematics as if the Planet Matters explores how Mathematics teachers can develop approaches to curriculum and learning which help students understand the nature of the contemporary world It sets out a model for teaching and learning that allows teachers to examine existing approaches to teaching and draw upon the insights of mathematics as a discipline to help students relate classroom mathematics to global issues such as climate change the economy food supplies biodiversity human rights and social justice Including practical examples suggestions for teaching activities and detailed further reading sections the book covers the mathematics of description in the measuring recording and statistical analysis that informs our knowledge of climate change consumption and sustainability the mathematics of prediction in the modelling used by governments scientists and businesses to plan roads power stations and food supplies and their effects the mathematics of communication in the news reports blogs and environmental campaigns incomplete without graphs charts and statistics The true worth of a school subject is revealed in how far it can account for and respond to the major issues of the time The issue of the environment cuts across subject boundaries and requires an interdisciplinary response Mathematics teachers are part of that response and they have a crucial role in helping students to respond to environmental issues and representations Advances of Artificial Intelligence in a Green Energy Environment Pandian Vasant, Joshua Thomas, Elias Munapo, Gerhard-Wilhelm Weber, 2022-05-20 Advances of Artificial Intelligence in a Green Energy Environment reviews the new technologies in intelligent computing and AI that are reducing the dimension of data coverage worldwide This handbook describes intelligent optimization algorithms that can be applied in various branches of
