Zimbabwe Integrated Science Paper 3 Past:

Great Zimbabwe Shadreck Chirikure, 2020-11-29 Conditioned by local ways of knowing and doing Great Zimbabwe develops a new interpretation of the famous World Heritage site of Great Zimbabwe. It combines archaeological knowledge including recent material from the author's excavations with native concepts and philosophies. Working from a large data set has made it possible for the first time to develop an archaeology of Great Zimbabwe that is informed by finds and observations from the entire site and wider landscape. In so doing the book strongly contributes towards decolonising African and world archaeology. Written in an accessible manner the book is aimed at undergraduate students, graduate students and practicing archaeologists both in Africa and across the globe. The book will also make contributions to the broader field such as African Studies, African History and World Archaeology through its emphasis on developing synergies between local ways of knowing and the archaeology.

The State of African Cities 2008, 2008 With rapidly increasing urban populations cities in Africa are faced with enormous challenges and will have to find ways to facilitate by 2015 urban services, livelihoods and housing for more than twice as many urban dwellers than it has today. A worrying trend with the African urbanization process is that it is a process rooted in poverty rather than an industrialization-induced socio-economic transition as in other major world urban regions. Africa's escalating urban problems have received less attention than warranted and now at the dawn of Africa's urban age these need to be addressed. publisher *Integrated Approaches to Higher Maize Productivity in the New Millennium*, 2004

The Dirty Side of the Garment Industry Nikolay Anguelov, 2015-09-04 When thinking about lowering or changing consumption to lower carbon footprints the obvious offenders come easily to mind: petroleum and petroleum products, paper and plastic, even food. But not clothes. Although the clothing industry is the second largest polluter after agriculture, most consumers do not think of clothes as a source of environment. Resources in Education, 2001

Climate Action in Southern Africa Philani Moyo, 2023-10-27 Using climate justice as an analytical tool, this volume examines the role of local mitigation and adaptation actions in Southern Africa in furthering climate resilient development. Climate Action in Southern Africa examines the intrinsic connection between local climate actions, climate resilient development and strides towards a just transition. The theoretical grounding in climate justice allows the authors to analyse whether current climate actions in Africa are truly effective for the poor and marginalised whose lives and livelihoods are impacted by a climate crisis largely not of their making. The authors also question the extent to which pathways to net zero carbon emissions by 2050 are achievable in Africa and ask whether this can be attained without undermining livelihoods and human development. Overall, this book argues that for any transition to be a just transition it has to be aligned with the pursuit of sustainable development and climate justice for current and future generations on the African continent. Drawing out key factors including politics, gender and migration, this volume will be of great interest to students and scholars of climate change, climate justice and African development. *Clean Water and Sanitation* Walter Leal Filho, Anabela Marisa
