management in Africa Ajayi, O.C. (ed),Mafongoya, P.L. (ed),2017-11-15 Climate change presents a profound challenge to food security and sustainable development in Africa Its negative impacts are likely to be greatest in the African region which is already food insecure In the face of global climate change and its emerging challenges and unknowns it is essential that decision makers base policies on the best available knowledge In recent years the knowledge of local and indigenous people often referred to as indigenous knowledge IK has been increasingly recognised as an important source of climate knowledge and adaptation strategies *Millets* Latika Yadav,Upsana Upsana,2024-01-31 Millets are a group of small seeded grasses that have been grown as food sources for humans and animals since ancient times These crops are highly nutritious and have a range of health benefits They are also highly adaptable to different growing conditions making them an important crop for

farmers in arid and drought prone regions Millets have been an integral part of the traditional diets of many cultures around the world and have gained renewed attention in recent years as a sustainable low input alternative to other cereal crops Despite their many benefits millets have been largely overlooked by modern industrial agriculture and their cultivation and use have declined in many regions There is a growing recognition of the need to promote and support the conservation and revival of millet cultivation as a key strategy to enhance food security and resilience in the face of climate change
