Matamanda, Lameck Kachena, 2023-12-09 This book focuses on the socio economic impacts of the COVID 19 pandemic and associated lockdowns on the welfare of the urban poor in the city of Harare Zimbabwe The authors look through the lenses of the urban health penalty the right to the city complexity theory and distributive justice theory These four theories help situate the COVID 19 pandemic and its impacts on the urban poor in the theoretical foundations that raise issues of how the poor are affected by disease health pandemics due to their living conditions Uniquely the authors use remote ethnography tools such as rich texts video diaries and photo uploads to provide evidence based stories of how COVID 19 mobility restrictions have affected poor urbanites in Harare The book concludes that the COVID 19 pandemic mandatory lockdowns have deepened social and spatial inequality among the urban poor threatening their right to the city The socio economic impacts can upsurge poverty increase unemployment and the risks of hunger and food insecurity reinforce existing inequalities and break social harmony in the cities even past the COVID 19 pandemic period These socioeconomic impacts must be considered to make just cities for all from a right to the city perspective The authors recommend that mandatory COVID 19 lockdowns should not only be treated as a law and order operation but as a medical intervention to stem the spread of the virus backed by measures to safeguard the livelihoods of the urban poor while also protecting the economy This means governments should provide social safety nets to informal sector operators whose income generating activities are affected the most during the time of emergencies like COVID 19
