Bates, Sarah H. Lees, 2013-06-29 This volume was developed to meet a much noted need for accessible case study material for courses in human ecology cultural ecology cultural geography and other subjects increasingly offered to fulfill renewed student and faculty interest in environmental issues The case studies all taken from the journal Human Ecology An Interdisciplinary Journal represent a broad cross section of contemporary research It is tempting but inaccurate to suggest that these represent the Best of Human Ecology They were selected from among many outstanding possibilities because they worked well with the organization of the book which in turn reflects the way in which courses in human ecology are often organized This book provides a useful sample of case studies in the application of the perspective of human ecology to a wide variety of problems in different regions of the world University courses in human ecology typically begin with basic concepts pertaining to energy flow feeding relations material cycles population dynamics and ecosystem properties and then take up illustrative case studies of human environmental interactions These are usually discussed either along the lines of distinctive strategies of food procurement such as foraging or pastoralism or as adaptations to specific habitat types or biomes such as the circumpolar regions or arid lands *Human and Environmental Security in the Era of Global Risks* Mohamed Behnassi, Himangana Gupta, Olaf Pollmann, 2018-10-24 This book discusses ways to deepen the debate on the linkages between global risks and human and environmental security The approach put forward in this book is one of questioning the ability of existing concepts regulatory frameworks technologies and decision making mechanisms to accurately deal with emerging risks to human and environmental security and to act in the direction of effectively managing their impacts and fostering the resilience of concerned systems and resources Empirical research findings from Africa Asia and the Pacific Islands are provided During the last decades the links between emerging risks and the security of humans and nature have been the object of considerable research and deliberations However it is only recently becoming an important focus of policy making and advocacy In this contributed volume it is presumed that the ability or lack thereof to make innovative conceptual frameworks institutional and policy arrangements and technological advances for managing the current emerging risks will foster or undermine the environmental security and consequently determine the future human security Moreover taking into account the links between environmental climate security human security and sustainability will help frame a new research agenda and potentially develop a broad range of responses to

Subrata Sankar Bagchi, Arnab Das, 2012-12-06 Human Rights and the Third World Issues and Discourses deals with the controversial questions on the universalistic notions of human rights It finds Third World perspectives on human rights and seeks to open up a discursive space in the human rights discourse to address unresolved questions citing issues and problems from different countries in the Third World 1 Whether alternative perspectives should be taken as the standard for human rights in the Third World countries 2 Should there be a universalistic notion of rights for Homo sapiens or are we talking about two diametrically opposite trends and standards of human rights for the same species 3 How far these Third World perspectives of human rights can ensure the protection of the minorities and the vulnerable sections of population particularly the women and children within the Third World 4 Can these alternative perspectives help in fighting the Third World problems like poverty hunger corruption despotism social exclusion like the caste system in India communalism and the like 5 Can there be reconciliation between the Third World perspectives and the Western perspective of human rights

Transactions of the Zimbabwe Scientific Association Zimbabwe Scientific Association, 1999 **The Zimbabwe Science News** , 1984 *Resources in education* , 1991 **Women Agency, Culture, and Crime in Education** Phinias Tafirei, 2023-12-08 In the recent times women agency in African circles has become a contested issue with some arguing that women in African traditional societies lack agentic power including the power to make independent decision The issue has become even more contested in education where culture meets face to face with agency in all its forms In an attempt to get to the bottom of the subject in question this book examines using empirical data from the field an often hidden crime acquaintance rape which for many years has been allowed to spread its tentacles in Africa s institutions of higher education This is to say acquaintance rape has been practised unconsciously in many cultures thereby undermining the agentic power of women in these cultures The book adopts institutions of higher education in Masvingo Province heretofore referred to as Masvingo of Zimbabwe to assess factors affecting students in higher education s perceptions of acquaintance rape The

population for this book consisted of students educators and other staff members in institutions of higher education in Masvingo The book reveals that culture gender peer pressure policy and legislation or law affect higher education students perceptions of acquaintance rape The book also establishes that college authorities non academic staff and students have inadequate knowledge of how to effectively manage or deal with acquaintance rape cases due to inadequate policies legislations or laws governing students behaviour in higher education A model to reduce acquaintance rape is proposed It recommends that all institutions of higher education should introduce acquaintance rape prevention and reduction programmes peer education programmes acquaintance rape reduction techniques and acquaintance in the curriculum
