Ndlovu-Gatsheni, 2013-06-01 Global imperial designs which have been in place since conquest by western powers did not suddenly evaporate after decolonization Global coloniality as a leitmotif of the empire became the order of the day with its invisible technologies of subjugation continuing to reproduce Africa's subaltern position a position characterized by perceived deficits ranging from a lack of civilization a lack of writing and a lack of history to a lack of development a lack of human rights and a lack of democracy The author's sharply critical perspective reveals how this epistemology of alterity has kept Africa ensnared within colonial matrices of power serving to justify external interventions in African affairs including the interference with liberation struggles and disregard for African positions Evaluating the quality of African responses and available options the author opens up a new horizon that includes cognitive justice and new humanism *The European Union and Global Development* S. Gänzle, S. Grimm, D. Makhan, 2012-04-17 An assessment of the capacity of the EU to

coordinate actors and policies with regards to global development The authors argue that the EU and its member states have the potential to act for global development when they are able to improve policy and actor coherence such as through better linking of bilateral and community programmes Research in the History of Economic Thought and Methodology Luca Fiorito, Scott Scheall, Carlos Eduardo Suprinyak, 2020-07-10 Volume 38B of Research in the History of Economic Thought and Methodology features a symposium on economists and authoritarian regimes in the 20th century It also features a new general research essay by Reinhard Schumacher and RHETM co editor Scott Scheall that provides new details concerning Carl Menger's life and career **State, Land and Democracy in Southern Africa** Arrigo Pallotti, Corrado

Tornimbeni,2016-03-03 Each country in southern Africa has a unique history but in all of them socio economic inequalities and high poverty levels weaken the governments legitimacy and represent a challenge to models of economic development One key issue appears to be the solution of the land question This vital concern affects both citizenship and democracy in the political systems of the region yet no government has shown the capacity or commitment to solve it In this volume leading European American and African scholars explore in detail the relationship between state land and democracy They examine the historical background of asset allocation and its impact on questions of nationality the definition of citizenship human rights and the current political and economic processes in southern Africa *The New Enclosures: Critical Perspectives on Corporate Land Deals* Ben White,Saturnino Borrás Jr.,Ruth Hall,Ian Scoones,Wendy Wolford,2013-09-13 This collection explores the complex dynamics of corporate land deals from a broad agrarian political economy perspective with a special focus on the implications for property and labour regimes labour processes and structures of accumulation This involves looking at ways in which existing patterns of rural social differentiation in terms of class gender ethnicity and generation are being shaped by changes in land use and property relations as well as by the re organization of production and exchange as rural communities and resources are incorporated into global commodity chains It goes further than the descriptive what and who questions in order to understand the how and why of these patterns It is empirically solid and theoretically sophisticated making it a robust and boundary changing work Contributors come from various scholarly disciplines Covering nearly all regions of the world the collection will be of interest to researchers from various disciplines policymakers and activists This book was originally published as a Special Issue of the Journal of Peasant Studies *Region-Building in Southern Africa* Chris Saunders,Gwinyayi Albert Dzinesa,Dawn Nagar,2013-07-04 How successful have Southern African states been in dealing with the major issues that have faced the region in recent years What could be done to produce more cohesive and effective region building in Southern Africa In this original and wide ranging volume which draws on an interdisciplinary team of mainly African and African based specialists the key political socio economic and security challenges facing Southern Africa today are addressed These include the various issues confronting the Southern African Development Community SADC and its institutions such as HIV AIDS migration and xenophobia land grabbing and climate change and the role of the main external actors involved with the region including the United Nations the European Union the United States and China The book also looks at the Southern African Customs Union and Southern African Development Finance Institutions including the Development Bank of Southern Africa and Industrial Development Corporation and issues of gender and peacebuilding In doing so the book goes to the heart of analyzing the effectiveness of SADC and other regional organisation suggesting how region building in Southern Africa may be compared with similar attempts elsewhere in Africa and other parts of the world
