CHAPTER 2

**THE BASICS OF RECORD KEEPING AND
FINANCIAL STATEMENT PREPARATION: BALANCE SHEET**

Questions, Exercises, and Problems: Answers and Solutions

See the text or the glossary at the end of the book.

Accounting is governed by the balance sheet equation, which shows the equality of assets with liabilities plus shareholders' equity:

$$\text{Assets} = \text{Liabilities} + \text{Shareholders' Equity}$$

To maintain this equality, it is necessary to report every event and transaction in a dual manner. If a transaction results in an increase on the left-hand side (Assets), dual transactions recording requires that one of the following must occur to maintain the balance sheet equation: decrease another asset; increase a liability; increase shareholders' equity. Similarly, if a transaction results in an increase in a Liability account, then one of the following must occur to maintain the balance sheet equation: decrease another liability; decrease shareholders' equity; increase an asset.
