Solution Of Neural Network By Simon Haykin:

Neural Networks and Learning Machines Simon S. Haykin, 2009 For graduate level neural network courses offered in the departments of Computer Engineering Electrical Engineering and Computer Science Renowned for its thoroughness and readability this well organized and completely up to date text remains the most comprehensive treatment of neural networks from an engineering perspective Matlab codes used for the computer experiments in the text are available for download at <http://www.pearsonhighered.com/haykin> Refocused revised and renamed to reflect the duality of neural networks and learning machines this edition recognizes that the subject matter is richer when these topics are studied together Ideas drawn from neural networks and machine learning are hybridized to perform improved learning tasks beyond the capability of either independently

Powerline Ampacity System Anjan K. Deb, 2017-12-19 Civilization's demands for electricity continue to grow yet environmental regulatory and economic constraints often preclude the construction of new power plants and transmission lines The challenge now faced by engineers equipment manufacturers and regulatory agencies is to find ways to maximize the capacity of existing power lines Powerline Ampacity System is the first step in meeting that challenge Along with developing a complete theory of transmission line ampacity the author uses object oriented modeling and expert rules to build a power line ampacity system He describes new transmission line conductor technologies and power electronics FACTS devices that can take full advantage of a dynamic line rating system He offers examples that clearly show the economic benefit of operating an interconnected transmission network that has a diverse mix of electricity generation sources He also discusses with examples generator stability enhancement by dynamic line rating
