Toastmasters CI Manual:

Raising a Toast Primit Pratim Ghosh, 2021-02-05 Raising a Toast is a compilation of 20 speeches that I had the good fortune of delivering in my journey as a Toastmaster. Most of these speeches have sprung from my personal anecdotes, some funny, some thought provoking. Few speeches will tell you stories of past and present of people and places through my eyes. And then there are a couple of speeches that raise some questions for you and me to reflect upon. But one common link that binds them all is the stage of Toastmasters where they found life. Each of these speeches gave me an opportunity to pen down some burning message inside of me to share my story to any audience which was willing to listen to connect with those who took back something from what I had to say. Raising a Toast is a humble attempt to carry these anecdotes, these stories, these questions from the conventional stage to the paperback stage. Written with the sole agenda of reaching out to more souls out there who are willing to listen. And with the hope that when they read this they get inspired to share their set of stories with the world.

Journey from CC1 to CC10 Rukhman Singh Rathore, The book is a compilation of my first 10 speeches in Toastmasters. These speeches are the 10 projects from the Competent Communicator manual that is given to every new member who joins Toastmasters. This book was written in order to record the work done by me.

The Routledge International Handbook of Global Therapeutic Cultures Daniel Nehring, Ole Jacob Madsen, Edgar Cabanas, China Mills, Dylan Kerrigan, 2020-08-24 The Routledge International Handbook of Global Therapeutic Cultures explores central lines of enquiry and seminal scholarship on therapeutic cultures, popular psychology and the happiness industry. Bringing together studies of therapeutic cultures from sociology, anthropology, psychology, education, politics, law, history, social work, cultural studies, development studies and American Indian studies, it adopts a consciously global focus, combining studies of the psychologisation of social life from across the world. Thematically organised, it offers historical accounts of the growing prominence of therapeutic discourses and practices in everyday life, before moving to consider the construction of self-identity in the context of the diffusion of therapeutic discourses in connection with the global spread of capitalism. With attention to the ways in which emotional language has brought new problematisations of the dichotomy between the normal and the pathological, as well as significant transformations of key institutions such as work, family, education and religion, it examines emergent trends in therapeutic culture and explores the manner in which the advent of new therapeutic technologies, the political interest in happiness and the radical privatisation and financialisation of social life converge to remake self-identities and modes of everyday experience. Finally, the volume features the work of scholars who have foregrounded the historical and contemporary implication of psychotherapeutic practices in processes of globalisation and colonial and postcolonial modes of social organisation. Presenting agenda-setting research to encourage interdisciplinary and international dialogue and foster the development of a distinctive new field of social research, *The Routledge International Handbook of Global Therapeutic Cultures* will appeal to scholars across the

social sciences with interests in the advance of therapeutic discourses and practices in an increasingly psychologised society
