terms the homotopy Lie algebra the translation of the Whitehead product to the homotopy groups of the loop space OX under the isomorphism $11 \rightarrow 1 \rightarrow OX \rightarrow LS$ category and cone length Since then however work has concentrated on the properties of these invariants and has uncovered some truly remarkable and previously unsuspected phenomena For example If X is an n dimensional simply connected finite CW complex then either its rational homotopy groups vanish in degrees $2 \leq 2n$ or else they grow exponentially
