The Urban Astronomer's Guide Rod Mollise,2006-12-22 Most amateur astronomers yearn to observe more frequently Many of them however live in urban and highly developed suburban areas that are heavily light polluted Due to this light pollution they are under the impression that deep sky objects nebulae galaxies star clusters are either invisible or not worth viewing from home This book describes the many objects that can be seen in a bright urban sky and shows the city or suburban astronomer how to observe object after object season after season This book covers the why how and what of astronomy under light polluted skies The prospective city based observer is told why to observe from home there are hundreds of spectacular objects to be seen from the average urban site how to observe the city sky telescopes accessories and moderns techniques and what to observe About 50% of the book is devoted to describing tours of the sky with physical and observational descriptions at the eyepiece drawings and photographs

The Astrophotography Manual Chris Woodhouse,2015-05 The Astrophotography Manual is for those photographers who aspire to move beyond using standard SLR cameras and editing software and who are ready to create beautiful images of nebulae galaxies clusters and the solar system Beginning with a brief astronomy primer this book takes readers through the full astrophotography process from choosing and using equipment through image capture calibration and processing This combination of technical background

information and the hands on approach brings the science down to earth with a practical method to plan for success Features include Over 400 images graphs and tables to illustrate these concepts A wide range of hardware to be used including smartphones tablets and the latest mount technologies How to utilize a variety of leading software such as Maxim DL Nebulosity Sequence Generator Pro Photoshop and PixInsight Case studies showing how and when to use certain tools and overcoming technical challenges How sensor performance and light pollution relate to image quality and exposure planning

[Meade LXD55 and LXD75 Telescopes](#) Martin Peston,2010-04-28 I have owned telescopes for over 25 years since I was a young lad I purchased an LXD55 AR 6 Refractor in 2002 and was one of the first to own one in the UK I am also a proud

owner of an LXD75 SC 8 Armed with these two very different telescopes I have spent many hours searching the skies for interesting objects using Meade's Autostar Goto facility My motivation to write a book about the LXD Goto telescope series first came from comments about an LXD55 AR 6 Refractor review that was published on the LXD55 com website From then on I have had regular emails from people asking technical questions about the telescope and which model is best suited for them Whilst attending Star parties in the UK I found that many LXD owners would struggle to use them even at a basic level especially if they have never owned or used an equatorially mounted Goto telescope before Since the first LXD55 models came out in early 2002 owners have struggled to find useful information to help them use the telescopes to the best advantage There have been mixed reactions about its quality and performance Hence this book is directed towards those who are new to Goto and the LXD telescope

with add ons like Wi Fi dongles a touch screen and more The credit card sized Raspberry Pi has become a global phenomenon Created by the Raspberry Pi Foundation to get kids interested in programming this tiny computer kick started a movement of tinkerers thinkers experimenters and inventors Where will your Raspberry Pi 3 take you The Raspberry Pi User Guide 3rd Edition is your ultimate roadmap to discovery Using Commercial Amateur Astronomical Spectrographs Jeffrey L. Hopkins,2013-11-19 Amateur astronomers interested in learning more about astronomical spectroscopy now have the guide they need It provides detailed information about how to get started inexpensively with low resolution spectroscopy and then how to move on to more advanced high resolution spectroscopy Uniquely the instructions concentrate very much on the practical aspects of using commercially available spectroscopes rather than simply explaining how spectroscopes work The book includes a clear explanation of the laboratory theory behind astronomical spectrographs and goes on to extensively cover the practical application of astronomical spectroscopy in detail Four popular and reasonably priced commercially available diffraction grating spectrographs are used as examples The first is a low resolution transmission diffraction grating the Star Analyser spectrograph The second is an inexpensive fiber optic coupled bench spectrograph that can be used to learn more about spectroscopy The third is a newcomer the ALPY 600 spectrograph The fourth spectrograph considered is at the other end of the market both in performance and cost the high resolution Lhires III While considerably more expensive this is a popular and excellent scientific instrument that allows more advanced amateur astronomers to produce scientifically valuable data With all of these tools in place the amateur astronomer is well prepared to forger deeper into the night sky using spectroscopy *Star Ware* Philip S. Harrington,2011-02-25 Praise for Star Ware Star Ware is still a tour de force that any experienced amateur will find invaluable and which hardware minded beginners will thoroughly enjoy Robert Burnham Sky distributors dealers and conventions and corporate listings for products and services *The Complete Guide to Fujifilm's X-T20 (B&W Edition)* Tony Phillips,2017-04-13 Written for Fujifilm s outstanding X T20 travel camera this is EVERYTHING X T20 explained in easy to understand language It is the Manual on Steroids and much more So if you re uncertain about anything your XT20 does grab this book It s packed with clear tutorials and examples with nearly 400 tips and tricks to help you master photography with your X T20 n this 616 page full color book you ll learn About every mode menu button function and socket How to get fully touchy feely with the new touch screen How the new Fujifilm flash system and EF X500 wireless flash works All about Lighting even Manual flash Plus more *So You Want a Meade LX Telescope!* Lawrence Harris,2010-07-20 Computers and Astronomy Perhaps every generation of astronomers believes that their telescopes are the best that have ever been They are surely all correct The great leap of our time is that computer designed and machined parts have led to more accurately made com nents that give the astronomer ever better views The manual skills of the craftsman mirror grinder have been transformed into the new age skills of the programmer and the machine maker The new products did not end the work of craftsman te scope makers though Many highly skilled amateur professional

opticians continued to produce good quality mirrors that are still seen today. Amateur priced telescopes are now capable of highly accurate tracking and computer control that were once only the province of professionals. This has greatly increased the possibilities of serious astronomy projects for which tailor made software has been developed. Add a CCD camera to these improved telescopes see Chap 3 and you bring a whole new dimension to your astronomy see Fig 1.1. Look Before You Leap. But first a word of caution. Unless you are already familiar with astronomy and basic telescopes it is not wise to start spending large amounts of money on a well featured telescope. Such an instrument might otherwise be subsequently abandoned due to a perceived overcomplexity coupled with a waning interest.
