Ute Van Workshop Manual:

The Oxford Handbook of Job Loss and Job Search Ute-Christine Klehe PhD, Edwin van Hooft PhD, 2018-05-08 Job search is and always has been an integral part of people's working lives. Whether one is brand new to the labor market or considered a mature experienced worker, job seekers are regularly met with new challenges in a variety of organizational settings. Edited by Ute Christine Klehe and Edwin A. J. van Hooft, *The Oxford Handbook of Job Loss and Job Search* provides readers with one of the first comprehensive overviews of the latest research and empirical knowledge in the areas of job loss and job search. Multidisciplinary in nature, Klehe, van Hooft, and their contributing authors offer fascinating insight into the diverse theoretical and methodological perspectives from which job loss and job search have been studied, such as psychology, sociology, labor studies, and economics. Discussing the antecedents and consequences of job loss, as well as outside circumstances that may necessitate a more rigorous job hunt, this Handbook presents in depth and up-to-date knowledge on the methods and processes of this important time in one's life. Further, it examines the unique circumstances faced by different populations during their job search, such as those working job to job, the unemployed, mature job seekers, international job seekers, and temporary employed workers. Job loss and unemployment are among the worst stressors individuals can encounter during their lifetimes. As a result, this Handbook concludes with a discussion of the various types of interventions developed to aid the unemployed. Further, it offers readers important insights and identifies best practices for both scholars and practitioners working in the areas of job loss, unemployment, career transitions, outplacement, and job search. AI methods for education have been a topic of AI research since many decades, with focus on Intelligent Tutoring Systems (ITS). ITS typically address a specific knowledge domain with a focus on individual learning support based on learning by problem solving, identification of misconceptions, and tailored feedback. Methods often are a combination of knowledge-based and machine learning approaches. Since the emergence of technologies based on Large Language Models (LLMs), the use of LLMs in educational contexts has received much attention, resulting in novel approaches. The Second Workshop on Artificial Intelligence for Artificial Intelligence Education (AI4AILEarning) has been held on September 24, 2024, in conjunction with the 47th German Conference on Artificial Intelligence in Würzburg, Germany. The workshop has a focus on research of AI methods for teaching.
