Energy, Natural Resources and Environmental Economics Endre Bjørndal, Mette Bjørndal, Panos M. Pardalos, Mikael Rönqvist, 2010-09-14 This book consists of a collection of articles describing the emerging and integrated area of Energy Natural Resources and Environmental Economics A majority of the authors are researchers doing applied work in economics finance and management science and are based in the Nordic countries These countries have a long tradition of managing natural resources Many of the applications are therefore founded on such examples The book contents are based on a workshop that took place during May 15-16 2008 in Bergen Norway The aim of the workshop was to create a meeting place for researchers who are active in the area of Energy Natural Resource and Environmental Economics and at the same time

celebrate Professor Kurt Jorsten's 60th birthday. The book is divided into four parts. The first part considers petroleum and natural gas applications taking up topics ranging from the management of incomes and reserves to market modeling and value chain optimization. The second and most extensive part studies applications from electricity markets including analyses of market prices, risk management, various optimization problems, electricity market design and regulation. The third part describes different applications in logistics and management of natural resources. Finally, the fourth part covers more general problems and methods arising within the area.

Handbook Of Energy Finance: Theories, Practices And Simulations Stephane Goutte, Duc Khuong Nguyen, 2020-01-30

Modeling the dynamics of energy markets has become a challenging task. The intensification of their financialization since 2004 had made them more complex but also more integrated with other tradable asset classes. More importantly, their large and frequent fluctuations in terms of both prices and volatility, particularly in the aftermath of the global financial crisis 2008-2009, pose difficulties for modeling and forecasting energy price behavior and are primary sources of concerns for macroeconomic stability and general economic performance. This handbook aims to advance the debate on the theories and practices of quantitative energy finance while shedding light on innovative results and technical methods applied to energy markets. Its primary focus is on the recent development and applications of mathematical and quantitative approaches for a better understanding of the stochastic processes that drive energy market movements. The handbook is designed for not only graduate students and researchers but also practitioners and policymakers.

Energy and Power Risk Management Alexander Eydeland, Krzysztof Wolyniec, 2003-02-03

Praise for *Energy and Power Risk Management*: *Energy and Power Risk Management* identifies and addresses the key issues in the development of the turbulent energy industry and the challenges it poses to market players. An insightful and far-reaching book written by two renowned professionals: Helyette Geman, Professor of Finance, University Paris Dauphine and ESSEC; and Vincent Kaminski, Managing Director, Citadel Investment Group LLC.
