Supporting Early Mathematical Development Caroline McGrath, 2025-10-14

Supporting Early Mathematical Development is an essential text combining theory and practice to enable successful mathematical education for children from birth to 12 years. This text considers how students, academics, parents, and professionals can develop their mathematical thinking practice whilst acknowledging there will always be a road yet to travel; we will always be practising the craft of teaching mathematics. Charting the delivery of mathematical development in playgroups, children's centres, nurseries, and primary schools, the book promotes an effective pedagogy for mathematics. This new edition provides a conceptualisation of mathematics and places a fresh emphasis on mathematical literacy to empower children. New chapters include the following: Mediators of Mathematical Thinking, Understanding Pattern, Pre-Algebraic and Algebraic Thinking, Naming, Renaming, and Processing Numbers, Statistics, Statistical Diagrams, and Probability Measure. Geometry. Throughout the book, Caroline McGrath navigates the complexity of teaching and learning mathematics through careful thought and consideration of mediators of mathematical thinking. This supportive book is designed for educators who want to know how to reconstruct mathematical ideas with children and respond in the moment. Returning to the root of understanding using the adaptive pedagogical style recommended in this text, you can create satisfying mathematical experiences for children.

Learning at Home Pre K-3 Ann Barbour, 2012-02. Establish a strong home school connection through family activities that extend.

Parents Make the Difference Susan Voorhees, 2014-05-14. Reading to your children has been recommended to parents of young children for decades by literacy experts. The act of shared book reading can promote academic language and literacy development; this is grounded in research. Not all shared book reading, however, is equally effective. In *Parents Make the Difference: Nourishing Literacy Development through Shared Book Reading*, Susan Voorhees guides parents to conduct enjoyable and productive book reading interactions with their young children. Parents will be informed about language and literacy learning in the early years and how to best engage in, before, during, and after shared book reading activities. While this book was written as an invitation to parents, teachers will also find it to be informative in guiding them to establish a supportive climate for sound developmentally appropriate literacy teaching practices. It is the responsibility of all stakeholders to nourish the literacy development of young children as they naturally move toward learning to read and become lovers of reading.

Early Sprouts Karrie Kalich, Dottie Bauer, Deirdre McPartlin, 2009-04-01. To counteract the prevalence of childhood obesity and to establish lifelong healthy eating habits, this research-based early childhood curriculum is designed to increase children's preferences for nutritious fruits and vegetables. The tested seed-to-table approach will engage preschoolers in all aspects of planting, growing, and eating organically grown foods. Also included are recipes children can help prepare and ways to involve the whole family in making healthy food choices. These activities can be tailored to fit any early childhood program, climate, or geographical region.

Teach a Child to Read Joyce M. Romanski, 2017-05-17. Reading is a basic and necessary skill in one's life and in the marketplace. The media is constantly presenting our nation's educational position. Innovative programs in all areas of the curriculum are televised.

There is a constant need to help all students to arrive at a grade level and above. With the adoption of the national core curriculum, there is a stronger emphasis on higher levels of performance in all areas, especially in reading. Teaching Someone to Read emphasizes teaching the initial reading skills. It will serve a variety of students, kindergarten to English as a second language for all levels. This handbook gives specific procedures for diagnosing to determine the student's current skill level. Then the sequence and lists of phonics are presented in a systematic way. Stress-free strategies for teaching phonics are described. Along with decoding ideas are presented for comprehension and writing. Teach Someone to Read is a helpful and practical tool for the instructor. **Try Your Hand at This** Kathy MacMillan, 2005-11-10. American Sign Language is more than just an assortment of gestures. It is a full-fledged, unique language with all the characteristics of such. This helpful and user-friendly guide for librarians and other library personnel involved in library programming demonstrates everything from how to set up programming involving sign language for all ages to dealing with and paying interpreters. The book also discusses how to publicize programs to the public and within the deaf community and how to evaluate and improve the library's sign language collection. Kathy MacMillan's impressive understanding and knowledge of the deaf community and the importance of sign language, as well as her exceptional handling of the numerous erroneous myths about deafness and sign language that are unfortunately still often current, make this handbook an indispensable tool for all library personnel looking to reach out to the deaf and hard of hearing community. *Storytime and Beyond* Kathy Barco, Melanie Borski-Howard, 2018-10-10. Join the world of balloons, pancakes, and musical instruments just a few items to help improve early literacy in the library, the classroom, and at home. Literacy builders covered range from music and instruments to magnetic letters, alphabet beads, and food. Literacy is a popular topic of discussion among librarians. Especially important is early literacy: what children know about reading and writing before they can actually read and write. In this book, experienced librarians Kathy Barco and Melanie Borski Howard share hands-on techniques that they have used to successfully promote early literacy and encourage family involvement. *Storytime and Beyond* teaches readers how to use literacy doodads, inexpensive props that add excitement to storytimes and can be used outside the library or classroom to enhance the basic components of any early literacy program: talking, singing, reading, writing, and playing. Many of the doodads can be created as family do-it-yourself projects, and some can be adapted to work with non-readers of any age. Instruments can also be a great way to get children's attention and teach literacy skills, whether it's a drum to beat while reading a story or a maraca for children to shake during a song. Lesson plans for musical storytimes address how to use rhythm, singing, and dancing to make early literacy fun. **Journey to Literacy: No Worksheets Required** Krista Flemington, Linda Hart-Hewins, Una Villiers, 2011. The play-based learning and individualized strategies in this practical book build on the wide range of literacy skills present in the kindergarten classroom. This resource explores simple ways to use traditional learning centres to provide children with real and authentic reasons to listen, speak, read, write, and view. Teachers will find a wealth of

resources for creating meaningful learning experiences including answers to often asked questions milestones to inform teaching instruction activities and games for both individuals and groups and literacy extensions that involve children with quality literature authentic artifacts and recordings This highly readable book will support teachers as they move beyond worksheets and nurture students on their journey to lifelong literacy Publisher
