Personally, I couldn't agree more with the proposal that a university education should include internships or other forms of work experience.

To begin with, internships help to bridge the gap between theory and practical application. University courses involve a lot of reading and listening to lectures. Of course, they do occasionally involve active participation in tutorials and group projects as well (depending on the particular course and university), but in relation to actual work duties they can never be much more than a simulation. Despite being armed with a lot of knowledge and background theory, students are hardly prepared for the everyday reality of the jobs they will eventually seek out in their field of study. By way of example, during a post-graduate course in Tourism Marketing I completed, one of the assessable tasks was to go out and do actual field research for tourism companies and even design a potential website for one of them. This was a brilliant chance for me to put the things I had learned into real practice, and get a feel for how they operated in the real world of work.

In addition, work experience of some kind is really beneficial for future employment opportunities. While the first priority for a lot of jobs is a relevant degree or qualification, it can't be disputed that appropriate work experience plays a massive role in determining who gets new positions and who doesn't. An internship results in important work experience but also references that really enhance a student's future job applications. In addition, it is often the case that internships result in contacts that lead to job offers before or right after a student has completed his or her degree. A very good friend of mine did an internship for a tourism company during his degree. He was offered a part-time job with them while still studying, and he later went on to become an international marketing director with the very same company. This was all a direct result of his work experience with that company while he was a student.

Finally, actual experience in a field of work can help students determine if they are studying towards a goal they actually want or can do well. Students often select courses based on what they think will be good to do for a career later, even though they know very little about that kind of job in terms of day-to-day realities. Additionally, students are still relatively young when they make these course selections, and their preferences and skills can change. One of my best friends initially studied towards an IT teaching degree. During a few trainee teacher placements in actual schools, he realised he was more interested in the IT side of things than the actual teaching. In fact, he didn't really enjoy the teaching environment at all. Subsequently he switched degrees to focus more exclusively on IT, and now he is a senior manager in an IT firm. While for some students the internship process verifies their course selection and motivates them to pursue it with more vigor, in this case it was a valuable means of showing my friend that he was studying something that he wasn't cut out for. He was able to change his course before he invested any more of his time and money in a fruitless degree.

Based on these considerations, I think internships and work experience as a mandatory part of university coursework are a sterling idea.
