Bigger Bombs for a Brighter Tomorrow John M. Curatola,2016-03-17 Right after World War II the United States felt secure in its atomic monopoly With the American Pax Atomica in place the free world held an apparent strategic advantage over the Soviet bloc and saw itself as a bulwark against communist expansion But America s atomic superiority in the early postwar years was more fiction than fact From 1945 until 1950 the U S atomic arsenal was poorly coordinated equipped and funded The newly formed Atomic Energy Commission inherited from the Manhattan Engineer District a program suffering from poor

organization failing infrastructure and internal conflict The military establishment and the Air Force s Strategic Air Command little knew what to do with this new weapon The Air Force and the AEC failed to coordinate their efforts for a possible atomic air offensive and war plans were ill conceived reflecting unrealistic expectations of Air Force capabilities and possible political outcomes This lack of preparedness serves as a case study in the tenuous nature of American civilian military relationships Instructors considering this book for use in a course may request an examination copy here
