pay bills keep records connect to your home PC and even file your taxes no matter how far away you roam **Ebony**,2008-01 EBONY is the flagship magazine of Johnson Publishing Founded in 1945 by John H Johnson it still maintains the highest global circulation of any African American focused magazine

Research Methods in Modern Urban Transportation Systems and Networks Elżbieta Macioszek,Grzegorz Sierpiński,2021-04-15 This book presents many valuable research methods useful in conducting research in modern urban transportation systems and networks The knowledge base in practical examples as well as the decision support methods described in this book is of interest to people who face the challenge of searching for solutions to the problems of contemporary transport networks and systems on a daily basis The book is therefore addressed to local authorities related to the planning and development of strategies for selected areas with regard to transport both in the urban and regional dimensions and to representatives of business and industry as people directly involved in the implementation of urban transportation systems and networks solutions The methods contained in individual chapters of the book allow to look at a given problem in an advanced way and facilitate the selection of the appropriate strategy e g in relation to the air quality in considering the impact of the atmospheric emission from the urban road traffic the role of incentive programs in promoting the purchase of electric cars life cycle costing decision making methodology and urban intersection design but also in assessing the impact of the socio financial conditions on the bike sharing system operation and its implementation in medium sized cities etc In turn due to the new approach to theoretical models including comparison methods of driving errors in a single lane and multi lane roundabouts methods of parking measurements methods of ensuring the technical readiness of transport companies fleet due to the region s capabilities as well as speed related surrogate measures of road safety based on floating car data the book is also of interest to scientists and researchers carrying out research in this area

International Encyclopedia of Transportation ,2021-05-13 In an increasingly globalised world despite reductions in costs and time transportation has become even more important as a facilitator of economic and human interaction this is reflected in technical advances in transportation systems increasing interest in how transportation interacts with society and the need to provide novel approaches to understanding its impacts This has become particularly acute with the impact that Covid 19 has had on transportation across the world at local national and international levels Encyclopedia of Transportation Seven Volume Set containing almost 600 articles brings a cross cutting and integrated approach to all aspects of transportation from a variety of interdisciplinary fields including engineering operations research economics geography and sociology in order to understand the changes taking place Emphasising the interaction between these different aspects of research it offers new solutions to modern day problems related to transportation Each of its nine sections is based around familiar themes but brings together the views of experts from different disciplinary perspectives Each section is edited by a subject expert who has commissioned articles from a range of authors representing different disciplines different parts of the world and different social perspectives The nine

sections are structured around the following themes Transport Modes Freight Transport and Logistics Transport Safety and Security Transport Economics Traffic Management Transport Modelling and Data Management Transport Policy and Planning Transport Psychology Sustainability and Health Issues in Transportation Some articles provide a technical introduction to a topic whilst others provide a bridge between topics or a more future oriented view of new research areas or challenges The end result is a reference work that offers researchers and practitioners new approaches new ways of thinking and novel solutions to problems All encompassing and expertly authored this outstanding reference work will be essential reading for all students and researchers interested in transportation and its global impact in what is a very uncertain world Provides a forward looking and integrated approach to transportation Updated with future technological impacts such as self driving vehicles cyber physical systems and big data analytics Includes comprehensive coverage Presents a worldwide approach including sets of comparative studies and applications

Participatory Sensing, Opinions and Collective

Awareness Vittorio Loreto,Muki Haklay,Andreas Hotho,Vito D.P. Servedio,Gerd Stumme,Jan Theunis,Francesca Tria,2016-05-13 This book introduces and reviews recent advances in the field in a comprehensive and non technical way by focusing on the potential of emerging citizen science and social computation frameworks coupled with the latest theoretical and modeling tools developed by physicists mathematicians computer and social scientists to analyse interpret and visualize complex data sets There is overwhelming evidence that the current organisation of our economies and societies is seriously damaging biological ecosystems and human living conditions in the short term with potentially catastrophic effects in the long term The need to re organise the daily activities with the greatest impact energy consumption transport housing towards a more efficient and sustainable development model has recently been raised in the public debate on several global environmental issues Above all this requires the mismatch between global societal and individual needs to be addressed Recent advances in Information and Communication Technologies ICT can trigger important transitions at the individual and collective level to achieve this aim Based on the findings of the collaborative research network EveryAware the following developments among the emerging ICT technologies are discussed in depth in this volume Participatory sensing where ICT development is pushed to the level where it can support informed action at the hyperlocal scale providing capabilities for environmental monitoring data aggregation and mining as well as information presentation and sharing Web gaming social computing and internet mediated collaboration where the Web will continue to acquire the status of an infrastructure for social computing allowing users cognitive abilities to be coordinated in online communities and steering the collective action towards predefined goals Collective awareness and decision making where the access to both personal and community data collected by users processed with suitable analysis tools and re presented in an appropriate format by usable communication interfaces leads to a bottom up development of collective social strategies
