given as to what specific decision is to be made rather the advice focuses on what the decision means to the reader and urges the reader to think carefully about the real impact of the decision Chapter topics are almost randomly positioned but purposely alternating between minor more casual topics and others that are more serious and thoughtful This is a non linear book that can be picked up and read in short intervals and in any order The reader might just need one particular chapter and once reading or at least scanning the book it can be used as a reference tool when needed The book is not meant to be read only one time just for enjoyment or to kill time in the airport In fact it is meant to be kept and used and passed along It is a book that Martha Stewart or the Today Show could recommend and would be a great gift This is an enjoyable book to read and one that will provide help and value for years to come **Moody's Industrial Manual** ,1962 *The Synthesizer*
