

Billing for Vaccines in Skilled Nursing Facilities: A Guide

Coding

The Centers for Medicare and Medicaid Services and the American Medical Association (AMA) have established codes for billing vaccines.

There are two components to billing any vaccine administered: the vaccine product/ingredients and its administration.

For the most up-to-date information on specific codes, visit the following websites:

In skilled nursing facilities, a vaccine may be billed by the facility or the long-term care pharmacy, depending both on whether a resident is in their Part A stay as well as what vaccine is being administered.

Staff

The LTC pharmacy can procure and bill for staff vaccination but it is typically considered out of network and not covered, leaving the facility or individual staff member to cover the bill.

The facility can choose to eat the cost of the vaccine or send staff elsewhere (eg, retail pharmacy or provider office that is a part of the insured staff person's network)

For COVID-19, uninsured staff can go to CVS/Walgreens, state they are uninsured, and use the Bridge Access Program. For other pharmacies who have applied to be Bridge Access Providers with eTrueNorth, an individual has to go online and get a QR code to prove they are uninsured.

Behind Closed Doors Joanne Stanton, Christine O'Donnell, 2017-09-26 *Behind Closed Doors* tells the story of two mothers who began investigating serious health issues in their own son and daughter and ended up writing an expose about the declining health of an entire generation of American children. In their relentless attempts to improve the health of their own children, they uncovered harmful trends in our food, pharmaceuticals, and environment, all stemming from weak laws and conflicts of interest. What they discovered shocked and ultimately empowered them to get actively involved in questioning and reforming these harmful out-of-balance practices and to inspire other moms to do the same. *Behind Closed Doors* not only offers scientifically verified evidence of how declining industry practices are harming our kids but showcases solutions like environmental medicine and other integrative health practices. Shares personal success stories and provides tools and solutions parents can immediately implement, equipping and inspiring us all to stand together for change. *Epidemiology and Prevention of Vaccine-preventable Diseases*, 2011. *Mission Possible*, 1997. *Travelers' Vaccines* Jane N.
