Abstract

Abstract

[illegible]

Other studies on psychosocial risk assessment have shown that the use of a structured questionnaire is a valid and reliable method for assessing psychosocial risk. The questionnaire used in this study was based on the findings of these studies and was designed to assess the following factors:

The data from studying the possible bias values are presented in Table 1. The data show information is useful allowing generally, and more specifically, the following observations to be made: (1) the more information is available, the more accurate the results produced;
