

Quick Setup Guide

To set up your projection TV, follow these steps:

- 1 Checking the Supplied Accessories
- 2 Carrying the Projection TV
- 3 Connecting Your Projection TV to Your Source Unit
- 4 Running Initial Setup
- 5 Adjusting the Convergence

1. After reading the Operating Instructions and this Quick Setup Guide, connect additional accessories to the projection TV. The electronic components are connected to the projection TV as follows:

1 Checking the Supplied Accessories

Along with your new projection TV, the package contains a remote control and two AA batteries. No additional cables are included. Please check out all you need to set up and operate the projection TV in its factory configuration.

Inserting Batteries

- 1 Remove the battery cover from the remote control.
- 2 Insert two size AA (R6) batteries (supplied) by matching the  and  terminals on the battery to the diagram inside the battery compartment.
- 3 Replace the battery cover.

- 4 Remove the battery to avoid damage from possible battery leakage whenever you recognize that the remote control will not be used for an extended period.
- 5 Handle the remote control with care.
- 6 Avoid dropping it, getting it wet, placing it in direct sunlight, near a heater, or where the humidity is high.

2 Carrying the Projection TV

- 1 Be careful when moving the TV.
- 2 When you place the TV in position, be careful not to drag it on your feet or fingers.
- 3 Watch your footing while installing the TV.
- 4 If you carry the TV in a manner other than the specified manner and without the specified number of persons, it may drop and a serious injury may be caused. Be sure to follow the instructions described below.
- 5 Carrying the TV requires four or more people.
- 6 Do not carry the TV holding the speaker grill.
- 7 Hold the TV tightly when carrying it.
- 8 The TV includes casters. Be sure to move your projection TV using these casters.

3 Connecting Your Projection TV

Review the following chart to determine which diagram to use to connect the components in your system.

For Most Components	For Source
	
	
	
	

- 1 Use the "Component" chart that appears with the diagram to determine which cables you'll need. You may need to purchase video accessories, such as cables and splitters, depending on the components you plan to connect.
- 2 Turn off and unplug all components before making connections.
- 3 If you have a component such as a DVD player that includes a DVI video output, you can connect it to the TV's HDMI input using a DVI-to-HDMI cable (not making audio cables).
- 4 If you are connecting a digital cable box, you'll need a special (or directional) splitter that's compatible with your cable box. Contact your cable provider for details.

Making Video Connections

Your TV includes several types of video inputs. Use the inputs that are available on your components that provide the best video performance, as described below.

Best Video Performance
 HDMI (High Definition Multimedia Interface)
 Component video
 F1080
 Composite video
 AV-Center

Good Video Performance

Additional Connections

For best video performance, connect your digital video components using either digital optical or digital coaxial audio connections.

If you are using a Dolby/DTS or digital audio optical output connector, see the Operating Instructions for details.

Depending on which components are in your system, you may need to complete additional connections. For example, if you have a satellite receiver, you'll need to connect the satellite antenna. If you have an A/V receiver, you'll need to connect speakers.

The connection diagrams shown on the rear panel are recommendations only; other possible systems may exist. Connections that include an A/V receiver can often be very complex, so check your A/V receiver's instruction manual for additional details.

4 Running Initial Setup

After you finish connecting the TV, you need to run Initial Setup, which automatically creates a list of available analog and digital channels. The Initial Setup screens appear when you turn on your TV for the first time after factory setup.

- 1 Press **POWER** to turn on the TV. The Initial Setup screen appears.
- 2 Using the remote control, move the highlight to the desired language, then press to select that language. The next screen instructs you to connect your video sources correctly. Check that you've connected your digital source correctly.
- 3 To start Auto Program, highlight **Yes** and then press **OK**. Auto Program automatically creates a list of available analog and digital channels. Auto Program may take 10 minutes or more to complete. A progress bar is displayed while the channel list is being created. The lowest numbered channel is displayed.

The lowest numbered channel is displayed.

5 Adjusting the Convergence

The projection tube image appears on the screen in three colors (red, green, and blue). If the three colors do not appear properly, the color is poor and the picture blurs. Before you use your TV, be sure to use the Flash Focus feature. Flash Focus adjusts the color projection settings automatically.

Allow the TV to warm up for about 30 minutes before you adjust the convergence with Flash Focus.

- 1 Turn on a TV or cable TV program.
- 2 Press the **Flash Focus** button on the front panel of the TV. The screen pattern appears and Flash Focus begins to work.

The adjustment is completed when the TV pattern returns.

Do Not Perform Additional Fine-Tuning Adjustments

- 1 Use the manual Convergence feature, as described in the Operating Instructions.

Notes on Flash Focus

- 1 The current pattern may differ from time and Flash Focus has completed its cycle. If you perform any other operations while Flash Focus is in progress, the Flash Focus operation is cancelled.
