The printing process

The printer employs a dye sublimation printing system. In this printing system, the thermal print head heats up as it passes over the yellow, magenta, and then cyan layer of the ink ribbon, causing the dyes to vaporize and permeate the surface of the print paper. Then the final cycle lays a laminate layer as an overcoat to protect the printed surface.

Notes

- The ink ribbon cannot be rewound. After you print 40 sheets of print paper, the ink ribbon runs out. You cannot reuse it by rewinding.
- Print paper eases from the back and front paper outlets each time a color is printed. Please wait until printing is completed and the print paper is automatically ejected onto the paper tray.
