

Full HD solid-state camcorder for superior HD Picture performance and more creative freedom.

PMW-EX1R Camcorder

The PMW-EX1R is the successor to the multiple award-winning EX1 and further extends the capabilities of the XDCAM EX family with great new features such as DVCAM recording, Cache Recording, Picture Inversion and a host of additional refinements. The EX1R is the ideal solution for customers such as broadcasters, independent videographers and film makers who need exceptional HD picture quality and state-of-the-art workflow from a compact and affordable handheld camcorder.

The XDCAM EX professional product range from Sony is designed to exploit the ultimate high performance of SxS memory cards. It combines a proven, non-linear XDCAM workflow with the only Full HD resolution sensor system available in a compact camcorder. This advanced imaging system consists of three 1/2-inch-type Exmor™ CMOS sensors, each with an effective pixel count of 1920x1080, to produce images in full HD resolution. In addition, there's a purpose-built Fujinon Professional HD 1.4x zoom lens and a unique dual focus ring mechanism.

Cutting-edge Camera Technology

The PMW-EX1R is equipped with three 1/2-inch-type Exmor CMOS sensors, each with an effective pixel count of 1920 (H) x 1080 (V). This technology delivers superior picture performance with full-HD resolution. Furthermore, this type of sensor allows the camcorder to provide an excellent sensitivity of F10, a remarkable signal-to-noise ratio of 54 dB, and a high horizontal resolution of 1000 **Exmor** FULL HD CMOS TV lines.

Other benefits include greatly reduced power consumption and associated heat dissipation in the PMW-EX1R, qualities which made possible the unique use of 1/2-inch-type sensors on these compact camcorders. In addition, this type of sensor can capture images with a shallower depth of field, giving users more freedom of creative expression.
