lenses to seven regions Europe East Asia and the Pacific South and Central Asia sub Saharan Africa the Middle East and North Africa Latin America and North America This disciplinary and regional combination provides an indispensable cohesive framework for understanding global issues The fully updated fourth edition includes four new global issues chapters The Refugee Crisis in Europe The Syrian Civil War and the Rise of the Islamic State Global Climate Change and The Globalization of Modern Sports **International Studies** Stanley Toops, Mark Allen Peterson, Walt Vanderbush, Naaborle

Sackeyfio, Sheldon Anderson, 2021-09-27 This book provides a much needed classroom text in international studies that is genuinely interdisciplinary in its approach International Studies focuses specifically on five core disciplines history geography anthropology political science and economics and describes them in relation to one another as well as their individual and collective contributions to the study of global issues The expert authors also emphasize the continuing importance of area studies within an interdisciplinary and global framework applying its interdisciplinary framework to substantive issues in seven regions Europe East Asia and the Pacific South and Central Asia sub Saharan Africa the Middle East and North Africa Latin America and North America This new edition has been completely updated and substantially revised with two new chapters on Media Sovereignty and Cybersecurity and Sustainable Development This disciplinary and regional combination offers a useful and cohesive framework for teaching students a substantive and comprehensive approach to understanding global issues *Advances in Shipping Data Analysis and Modeling* César Ducruet, 2017-11-06 Shipping flows maritime footprints remain underexplored in the existing literature despite the crucial importance of freight transport for global trade and economic development Additionally decision makers lack a comprehensive view on how shipping flows can be measured analyzed and mapped in order to support their policies and strategies This interdisciplinary volume drawing on an international cast list of experts explores a number of crucial issues in shipping data estimation construction collection mining analysis visualization and mapping *Advances in Shipping Data Analysis and Modeling* delivers several key messages First that in a world of just in time delivery and rapid freight transit it is important to bear in mind the long term roots of current trends as well as foreseeable future developments because shipping patterns exhibit recurrent if not cyclical and path dependent dynamics Second shipping flows are currently often understood at the micro level of intra urban logistics delivery and at the national level using commodity flow analyses but this volume emphasizes the need to expand the scale of analysis by offering new evidence on the changing distribution of global and international shipping flows based on actual data Third that this multidisciplinary approach to shipping flows can shed important light on crucial issues that go beyond shipping itself including climate change urban development technological change commodity specialization digital humanities navigation patterns international trade and regional growth Edited by experts in their field this volume is of utmost importance to those who study industrial economics shipping industries and economic and transport geography
