should be carried out and he established the rehydration time after the end of the drying or dental treatment which must be waited in order to regain a natural tooth colour and to get correct values and results again His findings also show that teeth are able to store information on for example the condition liquid content colour values and the time within the drying and liquid re absorption chronology The author articulates a dental chronometer tooth clock dental data store tooth data store and a dental memory tooth memory and believes that significant progress in this field may include and could be achieved via a neural network for colour measurement apparatus A book for anyone interested in the natural sciences Proceedings of 5th Borobudur International Symposium on Humanities and Social Science (BISHSS 2023) Zulfikar Bagus Pambuko,Muji Setiyo,Chrisna Bagus Edhita Praja,Agus Setiawan,Fitriana Yulastuti,Lintang Muliawanti,Veni Soraya Dewi,2024-08-01 This is an open access book In our rapidly evolving modern era the intersection of green technology and digital society has shifted paradigm shifts across various facets of human life The fusion of these two domains holds the potential to profoundly impact society s social aspects Therefore The 5th Borobudur International Symposium with the theme Smart and Sustainable The Synergy of Green Technology and Digital Society is designed to delve into and celebrate the strong synergy between green technology and the digital society specifically focusing on social sciences The background of this conference reflects the significant tensions in modern society On the one hand we witness innovative strides in green technology to reduce negative environmental impacts and develop more sustainable systems On the other hand our society is becoming increasingly interconnected in a vast digital network enabling unprecedented information exchange that influences social interactions work education and many other aspects of daily life As green technology and the digital society converge new and crucial opportunities and challenges emerge in the social context Through this International Conference we hope to provide a platform for researchers practitioners and stakeholders to share knowledge experiences and innovative ideas to better understand how green technology and the digital society can collaborate to achieve smarter and more sustainable societies
