Toxic Injustice A Transnational History Of Exposure And Struggle:

Toxic Injustice Susanna Rankin Bohme, 2015 The pesticide dibromochloropropane known as DBCP was developed by the chemical companies Dow and Shell in the 1950s to target wormlike soil dwelling creatures called nematodes Despite signs that the chemical was dangerous it was widely used in U S agriculture and on Chiquita and Dole banana plantations in Central America In the late 1970s DBCP was linked to male sterility but an uneven regulatory process left many workers especially on Dole s banana farms exposed for years after health risks were known Susanna Rankin Bohme tells an intriguing multilayered history that spans fifty years highlighting the transnational reach of corporations and social justice movements Toxic Injustice links health inequalities and worker struggles as it charts how people excluded from workplace and legal protections have found ways to challenge power structures and seek justice from states and transnational corporations alike

Toxic Amelia Fiske, Jonas Fischer, 2024-03-26 Over the past decade people have learned about oil contamination in the Ecuadorian Amazon through toxic tours in which a guide brings participants students lawyers environmental activists journalists and foreign tourists to visit contaminated sites These toxic tours combine personal experience and local knowledge to convince visitors of the immediacy of environmental issues Drawing on extensive research and fieldwork Toxic takes the reader on a visual toxic tour through the Amazon Following the story of three fictional participants this graphic novel paints a visceral picture of the waste pits gas flares and precarious lives of people in this region The book challenges the reader to consider what it means to live in a place and historical moment where victims of industrial toxicants are continually required to prove that harm has occurred Toxic is a vivid reflection on the role of pollutants in our everyday lives ultimately asking readers to reflect on how we are each implicated in the production consumption and exposure of pollution both in the Amazon and at home

Life without Lead Daniel Renfrew, 2018-09-04 Life without Lead examines the social political and environmental dimensions of a devastating lead poisoning epidemic Drawing from a political ecology of health perspective the book situates the Uruguayan lead contamination crisis in relation to neoliberal reform globalization and the resurgence of the political Left in Latin America The author traces the rise of an environmental social justice movement and the local and transnational circulation of environmental ideologies and contested science Through fine grained ethnographic analysis this book shows how combating contamination intersected with class politics explores the relationship of lead poisoning to poverty and debates the best way to identify and manage an unprecedented local environmental health problem

The Oxford Handbook of Agricultural History Jeannie M. Wayne, 2024 Agricultural history has enjoyed a rebirth in recent years in part because the agricultural enterprise promotes economic and cultural connections in an era that has become ever more globally focused but also because of agriculture s potential to lead to conflicts over precious resources The Oxford Handbook of Agricultural History reflects this rebirth and examines the wide reaching implications of agricultural issues featuring essays that touch on the green revolution the development of the Atlantic slave plantation the agricultural

impact of the American Civil War the rise of scientific and corporate agriculture and modern exploitation of agricultural labor

The Palgrave Handbook of the History of Human Sciences David McCallum,2022-08-27 The Palgrave Handbook of the History of Human Sciences offers a uniquely comprehensive and global overview of the evolution of ideas concepts and policies within the human sciences Drawn from histories of the social and psychological sciences anthropology the history and philosophy of science and the history of ideas this collection analyses the health and welfare of populations evidence of the changing nature of our local communities cities societies or global movements and studies the way our humanness or human nature undergoes shifts because of broader technological shifts or patterns of living This Handbook serves as an authoritative reference to a vast source of representative scholarly work in interdisciplinary fields a means of understanding patterns of social change and the conduct of institutions as well as the histories of these ways of knowing probe the contexts circumstances and conditions which underpin continuity and change in the way we count analyse and understand ourselves in our different social worlds It reflects a critical scholarly interest in both traditional and emerging concerns on the relations between the biological and social sciences and between these and changes and continuities in societies and conducts as 21st century research moves into new intellectual and geographic territories more diverse fields and global problematics

Razing Kids Jeffrey C. Sanders,2020-12-10 Children are the future Or so we like to tell ourselves In the wake of the Second World War Americans took this notion to heart Confronted by both unprecedented risks and unprecedented opportunities they elevated and perhaps exaggerated the significance of children for the survival of the human race Razing Kids analyzes the relationship between the postwar demographic explosion and the birth of postwar ecology In the American West especially workers policymakers and reformers interwove hopes for youth environment and the future They linked their anxieties over children to their fears of environmental risk as they debated the architecture of wartime playgrounds planned housing developments and the impact of radioactive particles released from distant hinterlands They obsessed over how riot riddled cities War on Poverty era rural work camps and pesticide laden agricultural valleys would affect children Nervous about the world they were making their hopes and fears reshaped postwar debates about what constituted the social and environmental good

Reckoning with Harm Amelia M. Fiske,2023-10-17 An ethnography of the Ecuadorian Amazon that demonstrates the need for a relational place based contingent understanding of harm and toxicity Reckoning with Harm is a striking ethnographic analysis of the harm resulting from oil extraction Covering fifty years of settler colonization and industrial transformation of the Ecuadorian Amazon Amelia Fiske interrogates the relations of harm She moves between forest courtrooms and oily waste pits farms and toxic tours to explore both the ways in which harm from oil is entangled with daily life and the tensions surrounding efforts to verify and redress it in practice Attempts to address harm from the oil industry in Ecuador have been consistently confounded by narrow technocratic understandings of evidence toxicity and responsibility Building on collaborators work to contest state and oil company insistence that harm is controlled and

principally chemical in nature Fiske shows that it is necessary to refigure harm as relational in order to reckon with unremediated contamination of the past while pushing for broad forms of accountability in the present She theorizes that harm is both a relationship and an animating feature of relationships in this place a contingent understanding that is needed to contemplate what comes next when living in a toxic world *Rethinking the American Environmental Movement post-1945* Ellen Spears,2019-06-28 Rethinking the American Environmental Movement post 1945 turns a fresh interpretive lens on the past drawing on a wide range of new histories of environmental activism to analyze the actions of those who created the movement and those who tried to thwart them Concentrating on the decades since World War II environmental historian Ellen Griffith Spears explores environmentalism as a field of movements rooted in broader social justice activism Noting major legislative accomplishments strengths and contributions as well as the divisions within the ranks the book reveals how new scientific developments the nuclear threat and pollution as well as changes in urban living spurred activism among diverse populations The book outlines the key precursors events participants and strategies of the environmental movement and contextualizes the story in the dramatic trajectory of U S history after World War II The result is a synthesis of American environmental politics that one reader called both ambitious in its scope and concise in its presentation This book provides a succinct overview of the American environmental movement and is the perfect introduction for students or scholars seeking to understand one of the largest social movements of the twentieth century up through the robust climate movement of today *Textbook of Global Health* Anne-Emanuelle Birn,Yogan Pillay,Timothy H. Holtz,2017 Fully revised and updated this fourth edition equips students advocates and health professionals with building blocks for a critical understanding of global health It explores societal determinants of health and health inequities within and between countries and an array of actions seeking to address these issues in spheres of health and development aid solidarity cooperation global and domestic policymaking and civil society mobilization *Evidence Contestation* Karin Zachmann,Mariacarla Gadebusch Bondio,Saana Jukola,Olga Sparschuh,2023-02-21 This book examines the practices of contesting evidence in democratically constituted knowledge societies It provides a multifaceted view of the processes and conditions of evidence criticism and how they determine the dynamics of de and re stabilization of evidence Evidence is an essential resource for establishing claims of validity resolving conflicts and legitimizing decisions In recent times however evidence is being contested with increasing frequency Such contestations vary in form and severity from questioning the interpretation of data or the methodological soundness of studies to accusations of evidence fabrication The contributors to this volume explore which actors for what reasons and to what effect question evidence in fields such as the biological environmental and health sciences In addition to actors inside academia they examine the roles of various other players including citizen scientists counter experts journalists patients consumers and activists The contributors tackle questions of how disagreements are framed and how they are used to promote vested interests By drawing on methodological and theoretical approaches from a

wide range of fields this book provides a much needed perspective on how evidence criticism influences the development and state of knowledge societies and their political condition Evidence Contestation will appeal to scholars and advanced students working in philosophy of science epistemology bioethics science and technology studies the history of science and technology and science communication **In Pursuit of Healthy Environments** Esa Ruuskanen,Heini Hakosalo,2020-11-12

In Pursuit of Healthy Environments brings temporal depth to a highly topical issue the interaction between health and the environment By means of a rich set of historical case studies from Americas to Europe and from the tropics to the Arctic the volume demonstrates that the concern for creating and finding healthy environments is not a new one shows how the link between the environment and health has been perceived at different times and in different cultures and discusses the practical implications of these conceptualizations The book written by scholars from architecture cultural anthropology history Indigenous Studies media studies and sociology will be of interest to a reader interested in the historical roots of present health related environmental issues It discusses the spatiality and materiality of the conceptions of health and the practices of nurture in colonial and post colonial environments and shows how greatly indigenous and colonial mindsets have differed during the last 300 years It also investigates how certain environments have become labelled as healthy and life preserving while others stigmatized by death and disease and how fluctuating these notions can be Finally it analyses the materialities and immaterialities as well as the transgenerational and transboundary characters of environmental and medical knowledge A Global History of Medicine Mark Jackson,2018-01-05

In recent decades there has been considerable interest in writing histories of medicine that capture local regional and global dimensions of health and health care in the same frame Exploring changing patterns of disease and different systems of medicine across continents and countries *A Global History of Medicine* provides a rich introduction to this emergent field The introductory chapter addresses the challenges of writing the history of medicine across space and time and suggests ways in which tracing the entangled histories of the patchworks of practice that have constituted medicine allow us to understand how healing traditions are always plural permeable and shaped by power and privilege Written by scholars from around the world and accompanied by suggestions for further reading individual chapters explore historical developments in health medicine and disease in China the Islamic World North and Latin America Africa South east Asia Western and Eastern Europe and Australia and New Zealand The final chapter focuses on smallpox eradication and reflects on the sources and methods necessary to integrate local and global dimensions of medicine more effectively Collectively the contributions to *A Global History of Medicine* will not only be invaluable to undergraduate and postgraduate students seeking to expand their knowledge of health and medicine across time but will also provide a constructive theoretical and empirical platform for future scholarship *The Gardeners' Dirty Hands* Noah J. Toly,2019-05-21 The past three centuries have witnessed the accumulation of unprecedented levels of wealth and the production of unprecedented risks These risks include the declining

integrity and stability of many of the world's environments which face dramatic and possibly irreversible change as the environmental burdens of late modern lifestyles increasingly shift to fragile ecosystems vulnerable communities and future generations Globalization has increased the scope and scale of these risks as well as the pace of their emergence It has also made possible global environmental governance attempts to manage risk by unprecedented numbers and types of authoritative agents including state and non state actors at the local national regional and global levels In *The Gardeners Dirty Hands Environmental Politics and Christian Ethics* Noah Toly offers an interpretation of environmental governance that draws upon insights into the tragic the need to forego give up undermine or destroy one or more goods in order to possess or secure one or more other goods Toly engages Christian and classical Greek ideas of the tragic to illuminate the enduring challenges of environmental politics He suggests that Christians have unique resources for responsible engagement with global environmental politics while acknowledging the need for mutually agreed and ultimately normative restraints
