

SMT-710 Manual Thermostat with Zone Control

Thank you for the purchase of the Smart Temp SMT-710 Zone Control Thermostat.

Please take the time to read and understand this manual so that you may take advantage of the many features this thermostat may offer

Turning your Thermostat On and OFF.

The lower left corner of the display controls the mode selection, depending on how your installer has set your SMT-710 up you will be given the option of selecting On and Off with a single set point (with a preset differential between the heating and cooling) or selecting individual heating and cooling modes, each with individual heating and cooling set points.

OFF ON AUTO
HEAT COOL

If the text **Heat** or **Cool** is flashing then your SMT-710 is requesting that function from your air conditioning system.

If set for Heat and Cool mode, a maximum heating and cooling set point limit may be imposed. Text and a chirp will be given when this limit is reached.

Fan ON Ventilation
Low Medium High Auto

Controlling the Fan Speed and Mode.

The SMT-710 can control a single or multi speed fan system. This capability will be setup by your installer to match the capability of the Air Conditioning system that it is controlling.

Fan Mode

Press and hold the fan button to select Fan On Mode - in 3 fan speed mode or tap in single fan speed mode. In this mode the fan will run continuously regardless of the heating or cooling. Press and hold (or tap) again to return to Fan Auto mode where the fan will turn on and off with the heating and cooling.

Fan Speed

The SMT-710 can also control multi-fan speed systems where you can either manually select between Low, Medium and High fan speed or let the SMT-710 automatically select the best fan speed based on how far the room temperature is from the set temperature. Simply tap the fan button to cycle through all available speeds if this function is enabled.

Setting your desired Temperature.

The display will show you your current room temperature along with some Up/Down buttons. When you tap either of the up down button the display will change and show you the set temperature for the currently selected mode, being the Heat set point in Heat only mode and the Cool set point in Cool only mode or the single set point in Auto or On mode.

(Note, in single set point mode your installer will have defined a "Dead Band" of a few degree either side of the internal heat and cool set points where the heating or cooling is not needed.

Limit Control

Your installer many have set a temperature control limit, where the range of temperature adjustment may be restricted. Text showing the limit has been reached will be shown on the display accompanied by a few beeps.

Zone Control

One of the strengths of the SMT-710 is its ability to manage two independent zones. These zones are identified as either Zone 1 (The location of the wall Controller) and Zone 2. If the zone is shown as "selected" then conditioned air will be sent to this area and the air conditioning will turn on and off to maintain this zones temperature.

Zone 1
SELECTED

Single Sensor Zone Control

If the SMT-710 does not have the optional Zone 2 temperature sensor fitted, then it will assume both Zone 1 temperature and Zone 2 temperature is the same - as measured by the wall controller in Zone 1. The air conditioning will turn on and off to maintain the current set point.

Twin Sensor Zone Control

When the SMT-710 detects the Zone 2 sensor has been installed, it will control both Zone 1 and Zone 2 to ensure both zones temperature is maintained to the desired value. This may mean that conditioned air may automatically be sent to Zone 2 only (for example) if zone 2 needs additional heating or cooling to reach the desired set point. The Air Conditioning system will treat both zones independently.

Room Temperature Display - Twin sensor

The SMT-710 will display the Zone 1 temperature when ever Zone 1 only is selected or if Zone 1 and Zone 2 is selected. If Zone 2 only is selected the SMT-710 will display Zone 2 temperature.

Note, if at anytime you wish to see the Zone 2 temperature, press and hold the Zone 2 button for 2 seconds and the display will go blank except for the Zone 2 button and the room temperature as measured in Zone 2. The display will return to normal after 4 seconds.
