Smart Technologies in Healthcare Bruno Bouchard,2017-06-26 Assistive technologies for the old and people with disabilities is now a very active field of research It also constitutes a very profitable market expected to reach US 60 billion p a by 2018 The book covers key aspects of this important field and provides guidelines for developing assistive technologies in smart environments The book also presents the new paradigm of open innovation used by the most prolific research teams around the world The latest developments in the field are given Overall this book will be a reference for researchers practitioners and engineers

The Ultimate Guide for Laser and IPL in the Aesthetic Field Kamal Alhallak,Adel Abdulhafid,Salem Tomi,Dima Omran,2023-05-22 This book offers practitioners a comprehensive reference to light based treatments that combines theory and best practices It is unique in that it compares the various modalities and platforms of laser and IPL treatments while also discussing the most recent technological advancements It also includes comprehensive treatment protocols settings and laser operating procedures Furthermore the book compares the mechanism of action of different lasers based on the skin light interaction according to wavelength pulse width and delivery methods making it invaluable to new practitioners and medical directors in the aesthetic medicine field The book includes over 100 colour images and videos to help readers better understand techniques and treatment procedures This visual aid makes the book especially useful when following treatment protocols Chapters delve into every aspect of laser and IPL in aesthetics including skin anatomy hair reduction vascular lesions pigmentary conditions scar remodelling stretch mark revision facial rejuvenation skin toning technologies and wrinkle reduction methods Furthermore the book includes two chapters that will help practitioners invest in new and refurbished laser machines The Ultimate Guide for Laser and IPL in the Aesthetic Field with its comprehensive coverage of laser and IPL treatments in aesthetics is an indispensable resource for healthcare professionals looking to refine their skills or refresh their knowledge on light based treatments It combines theories with practical aspects to provide the reader with everything they need to know about effective treatment delivery making it an

invaluable reference for any aesthetic practitioner

Plant Flow Measurement and Control Handbook Swapan Basu, 2018-08-22 Plant Flow Measurement and Control Handbook is a comprehensive reference source for practicing engineers in the field of instrumentation and controls. It covers many practical topics such as installation, maintenance, and potential issues, giving an overview of available techniques along with recommendations for application. In addition, it covers available flow sensors such as automation and control. The author brings his 35 years of experience in working in instrumentation and control within the industry to this title, with a focus on fluid flow measurement, its importance in plant design, and the appropriate control of processes. The book provides a good balance between practical issues and theory and is fully supported with industry case studies and a high level of illustrations to assist learning. It is unique in its coverage of multiphase flow, solid flow, process connection to the plant, flow computation, and control. Readers will not only further understand design but they will also further comprehend integration tactics that can be applied to the plant through a step by step design process that goes from installation to operation. Provides specification sheets, engineering drawings, calibration procedures, and installation practices for each type of measurement. Presents the correct flow meter that is suitable for a particular application. Includes a selection table and step by step guide to help users make the best decision. Cover examples and applications from engineering practice that will aid in understanding and application. *Energy Research Abstracts*, 1993

Arias' Practical Guide to High Risk Pregnancy-E-Book Amarnath G Bhide, Arulkumaran S, Kaizad Damania, SN Daftary, Aundrea Arias Schubbe, 2024-11-13 Go to book for fetal, maternal, medicine, and labour. Material grouped into specific sections. Latest guidelines, recommendations, and evidence. Support of illustrations, flowcharts, and figures. Reference lists for interested readers. Foundations of basic concepts and their explanations. Boxes for salient features. Majority of chapters end with important points. Identification of knowledge gaps and suggested research agenda. Special chapter devoted to audit and clinical governance, maternal collapse. A must-have book for students and practitioners alike.

The Ultimate AndroidDAQ Guide Rick Fluck, The Ultimate AndroidDAQ Guide is an in-depth look into the techniques of data acquisition and process control using the parallel processing microcontroller on the AndroidDAQ module. It teaches you sensing and electronic drive circuits and how to implement these circuits in programming languages like Android, LabVIEW, Java, and Python. The book also shows you how to leverage and use the menu command structure used in the AndroidDAQ open source firmware for the many data acquisition tasks that are used in robotic and product design. Many examples are given to allow you to control your AndroidDAQ module in ways other popular development modules can not via USB, Bluetooth, or Wi-Fi communication. It is a guide to help you make your next project be part of the Internet of Things.

Meeting SDGs in Smart City Infrastructures Manas Pradhan, 2025-09-01 Meeting SDGs in Smart City Infrastructures. Federation, Interoperability, and Discoverability explains the current state of the art practices in the smart city context for digitization and e-governance processes in accordance with the UN Sustainable Development Goals. It discusses pros and cons of the various data

standards and federation measures involved in the digital transformation of cities considering the end user as well as implementor's viewpoint. It utilizes real world use cases of cities around the world highlighting their goals and what measures they have adopted. It provides guidelines for achieving long term service federation interoperability and discoverability while keeping the UN SDGs in perspective. This book provides the basic insights for technical and strategic viewpoints for data and communication interoperability and federation measures. Later it provides federated scaling solutions to enable service discovery and features in a cross sector deployment. These are useful for designing digitisation measures by using one or leveraging overlapping features of many introduced solutions. These solutions are provided for specific contexts and use cases making understandability of the technical interfaces and their relationship with governance mechanisms easier for a range of audiences working in smart city contexts. This book will help practitioners and researchers in the smart city domain better understand existing and evolving technologies and how to better formulate their processes to provide a sustainable model for urban development. Giving them insight into the feasibility and implications of highly scalable smart city and urban solutions will allow better constructs for urban digital ecosystems enabling information exchange and interoperability across multiple sectors. It ultimately supports infrastructure goals of ensuring security, privacy and transparency while enabling future concepts for Artificial Intelligence, Machine Learning, Linked Data and e governance. Defines and describes real world digital transformation needs arising from smart city domain. Analyzes standards, methods and best practices related to processes in smart city infrastructure builds. Analyzes and makes recommendations related to the technologies both legacy and upcoming, their set up functions and the future requirements to meet the SDGs.

Smart Systems: Innovations in Computing Arun K. Somani, Ankit Mundra, Robin Doss, Subhajit Bhattacharya, 2021-09-03. This book features original papers from the 3rd International Conference on Smart IoT Systems, Innovations and Computing (SSIC 2021) presenting scientific work related to smart solution concepts. It discusses scientific works related to smart solutions concept in the context of computational collective intelligence, consisted of interaction between smart devices for smart environments and interactions. Thanks to the high quality content and the broad range of the topics covered, the book appeals to researchers pursuing advanced studies.

Machine Learning Techniques for Smart City Applications: Trends and Solutions D. Jude Hemanth, 2022-09-19. This book discusses the application of different machine learning techniques to the sub concepts of smart cities such as smart energy, transportation, waste management, health, infrastructure etc. The focus of this book is to come up with innovative solutions in the above mentioned issues with the purpose of alleviating the pressing needs of human society. This book includes content with practical examples which are easy to understand for readers. It also covers a multi disciplinary field and consequently it benefits a wide readership including academics, researchers and practitioners.

Innovative Testing and Measurement Solutions for Smart Grid Qi Huang, Shi Jing, Jianbo Yi, Wei Zhen, 2016-04-25. Focuses on sensor applications and smart meters in the newly developing interconnected smart grid.

Focuses on sensor applications and smart meters in the newly developing interconnected smart grid Presents the most updated technological developments in the measurement and testing of power systems within the smart grid environment Reflects the modernization of electric utility power systems with the extensive use of computer sensor and data communications technologies providing benefits to energy consumers and utility companies alike The leading author heads a group of researchers focusing on the construction of smart grid and smart substation for Sichuan Power Grid one of the largest in China's power system

Smart Legal Contracts Jason Allen, Peter Hunn, 2022-04-04 Smart Legal Contracts Computable Law in Theory and Practice is a landmark investigation into one of the most important trends at the interface of law and technology the effort to harness emerging digital technologies to change the way that parties form and perform contracts While developments in distributed ledger technology have brought the topic of smart contracts into the mainstream of legal attention this volume takes a broader approach to ask how computers can be used in the contracting process This book assesses how contractual promises are expressed in software and how code based artefacts can be incorporated within more conventional legal structures With incisive contributions from members of the judiciary legal scholars practitioners and computer scientists this book sets out to frame the borders of an emerging area of law and start a more productive dialogue between the various disciplines involved in the evolution of contracts as software It provides the first step towards a more disciplined approach to computational contracts that avoids the techno legal ambiguities of smart contracts and reveals an emerging taxonomy of approaches to encoding contracts in whole or in part Conceived and written during a time when major legal systems began to engage with the advent of contracts in computable form and aimed at a fundamental level of enquiry this collection will provide essential insight into future trends and will provide a point of orientation for future scholarship and innovation

Mobile Devices and Smart Gadgets in Medical Sciences Umair, Sajid, 2020-02-21 Each day new applications and methods are developed for utilizing technology in the field of medical sciences both as diagnostic tools and as methods for patients to access their medical information through their personal gadgets However the maximum potential for the application of new technologies within the medical field has not yet been realized Mobile Devices and Smart Gadgets in Medical Sciences is a pivotal reference source that explores different mobile applications tools software and smart gadgets and their applications within the field of healthcare Covering a wide range of topics such as artificial intelligence telemedicine and oncology this book is ideally designed for medical practitioners mobile application developers technology developers software experts computer engineers programmers ICT innovators policymakers researchers academicians and students

Biomimetic Robotic Artificial Muscles Kwang Jin Kim, Hyouk Ryeol Choi, Xiaobo Tan, David Pugal, 2013-03-26 Biomimetic Robotic Artificial Muscles presents a comprehensive up to date overview of several types of electroactive materials with a view of using them as biomimetic artificial muscles The purpose of the book is to provide a focused in depth yet self contained treatment of recent advances made in several promising EAP materials In particular ionic polymer metal

composites conjugated polymers and dielectric elastomers are considered Manufacturing physical characterization modeling and control of the materials are presented Namely the book adopts a systems perspective to integrate recent developments in material processing actuator design control oriented modeling and device and robotic applications While the main focus is on the new developments in these subjects an effort has been made throughout the book to provide the reader with general basic information about the materials before going into more advanced topics As a result the book is very much self contained and expected to be accessible for a reader who does not have background in EAPs Based on the good fundamental knowledge and the versatility of the materials several promising biomimetic and robotic applications such robotic fish propelled by an IPMC tail an IPMC energy harvester an IPMC based valveless pump a conjugated polymer petal driven micropump and a synthetic elastomer actuator enabled robotic finger are demonstrated ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING AND MARKETING MANAGEMENT James Seligman,2018-09-20 OBJECTIVES The book objectives provide a full delivery of information on the fields of artificial intelligence AI and machine learning ML to educators students and practitioners of marketing By explaining AI and ML terminology and its applications including marketing the book is designed to inform and educate Marketing use of AI and ML has exploded in recent decades as marketers have seen the considerable benefits of these two technologies It is understood and explained that AI deals with Intelligent behaviour by machines rather than natural intelligence found in humans and animals it is the machine mimicking cognitive functions that humans associate with the mind in learning expression and problem solving and much more
