

## OVERVIEW

The SMCWEB-N is a multi-function Wireless-N (802.11n draft) networking device: Access Point and Ethernet Client modes. Designed for multimedia applications, SMCWEB-N can be used in Access Point mode to add high-speed wireless connectivity to your network, or Client mode to simultaneously connect multiple Ethernet enabled devices such as a game console, digital media player or Network Attached Storage.

The SMCWEB-N is 802.11n draft v2.0 compliant while maintaining full backwards compatibility with the Wireless-G (802.11g) and Wireless-B (802.11b) standards. This next generation wireless networking standard utilizes advanced MIMO (Multiple-In, Multiple-Out) technology to deliver incredible speed and range. With wireless speeds up to 300Mbps and extended coverage, there is enough bandwidth to simultaneously stream video and audio, play online games, transfer large files, make VoIP calls and surf the

Internet. With security being a key consideration, SMCWEB-N supports the latest WPA and WPA2 wireless encryption standards, which prevent unauthorized access to wireless networks and ensure data is secure. Wireless security can also be set up easily using Wi-Fi Protected Setup™ (WPS) that enables push button or PIN configuration.

For an enhanced multimedia experience Wireless Intelligent Stream Handling technology automatically manages and prioritizes the flow of time-sensitive data in your wireless network, without the need for end user configuration. As a result time-sensitive applications like online gaming, voice and video, run smoothly without lag and breakup problems. Finally, configuration is made simple and straightforward with the Installation Wizard, intuitive web-based management interface and slide switch for easily selecting operating mode.
