From Additive Manufacturing to 3D/4D Printing 3 Jean-Claude André, 2018-03-07 With a turnover of some 5 15 billion year the additive manufacturing

has industrial niches bearers thanks to processes and materials more and more optimized While some niches still exist on the application of additive techniques in traditional fields from jewelry to food for example several trends emerge using new concepts collective production realization of objects at once without addition Of material micro fluidic 4D printing exploiting programmable materials and materials bio printing etc There are both opportunities for new markets promises not envisaged less than 10 years ago but difficulties in reaching them

Science and Society in Latin America Pablo Kreimer, 2019-04-02 In the form of a sociological pilgrimage this book approaches some topics essential to understanding the role of science in Latin America juxtaposing several approaches and exploring three main lines First the production and use of knowledge in these countries viewed from a historical and sociological point of view second the reciprocal construction of scientific and public problems presented through significant cases such as Latin American Chagas Disease and third the past and present asymmetries affecting the relationships between centers and peripheries in scientific research These topics show the paradox of being at the same time modern and peripheral

From Additive Manufacturing to 3D/4D Printing 1 Jean-Claude André, 2017-11-29 In 1984 additive manufacturing represented a new methodology for manipulating matter consisting of harnessing materials and or energy to create three dimensional physical objects Today additive manufacturing technologies represent a market of around 5 billion euros per year with an annual growth between 20 and 30% Different processes materials and dimensions from nanometer to decameter within additive manufacturing techniques have led to 70 000 publications on this topic and to several thousand patents with applications as wide ranging as domestic uses Volume 1 of this series of books presents these different technologies with illustrative industrial examples In addition to the strengths of 3D methods this book also covers their weaknesses and the developments envisaged in terms of incremental innovations to

La recherche en réformes Jérôme Aust,Cécile Crespy,2014-09-16 Renforcement du financement sur projets et de l'évaluation intensification des injonctions la valorisation économique de la science implication croissante des collectivités locales et de l'Europe influence de la nouvelle gestion publique dans le gouvernement de la recherche voici quelques unes des transformations qui ont affecté les politiques de recherche en France et en Europe depuis le début des années 2000 En redessinant les frontières entre la profession scientifique l'état et le marché ces réformes suscitent des contestations et des controverses Peu d'enquêtes ont cependant tenté de comprendre et analyser les conséquences de ces réformes L'objectif

de ce livre est de rendre compte de ces évolutions en mobilisant des enquêtes de terrain approfondies. En faisant varier les points de vue et les échelles d'analyse, l'ouvrage offre un tableau documenté des formes en cours en France mais aussi en Grande Bretagne, en Allemagne ou au Japon. Cet ouvrage suggère que les restructurations en cours sont complexes et qu'elles ne se résument pas à une emprise croissante de l'état et du marché sur le gouvernement de la recherche. Les membres de la profession académique ne subissent pas ces transformations sans capacités de résistance et d'action et les formes suscitent aussi des oppositions sociales et éthiques qui contribuent à redessiner les équilibres entre science, état et marché. Jérôme AUST est chargé de recherche Sciences Po CSO CNRS, Chargé de cours Sciences Po à l'Ecole normale supérieure de Lyon et Sciences Po Lyon. Il travaille sur les recompositions qui marquent les politiques d'enseignement supérieur et de recherche. Cécile CRESPIY est Professeure des universités en science politique Sciences Po Toulouse et chercheure au LaSSP Laboratoire des sciences sociales du politique. Ses recherches portent sur le gouvernement des politiques scientifiques et universitaires.

Traité de la matière Libero Zuppiroli, 2015-07-02. La matière accompagne l'homme dans toutes ses activités. Il sait l'extraire, la transformer ou en faire la synthèse mais aussi l'imaginer, la révéler même au travers de pratiques comme l'alchimie ou les nanosciences. Il en a fait des matériaux utilisables dans toutes ses constructions réelles ou qui portent son monde virtuel comme le silicium ultra pur, des puces qu'il fabrique, l'échelle du nanomètre, les cristaux liquides des écrans, le cuivre des connexions électriques ou les matières plastiques des boîtiers et emballages. Ce traité est né du désir de dévoiler les secrets de la matière dans ses relations avec l'homme et d'interroger de manière critique ses utilisations. La première partie destine un large public de curieux, interroge la créativité en sciences de la matière. Comment contrôler les propriétés exceptionnelles de chaque type de matériau, quelle échelle opérer, celle macroscopique de notre quotidien, celle microscopique des atomes ou encore aux échelles intermédiaires de la microstructure. Ce texte s'accompagne des contributions d'artistes s'exprimant à propos de la matière dont les mandalas de Gisèle Rime, l'exploration du chaos de Catherine Bolle ou les 120 photographies originales de Christiane Grimm. La seconde partie, plus spécialisée, rappelle que la cohésion des matériaux relève de la mécanique quantique et que leurs propriétés sont liées entre autres à la théorie statistique des milieux ou la théorie des dislocations. Un excellent ouvrage d'une grande clarté qui se présente aussi comme un livre d'art par la qualité des images du papier et de l'impression. Pour La Science Originale, attrayant, inspirant et sortant résolument des sentiers battus. La Croix.

Numérique & vie Véronique Kleck, 2006. La révolution numérique confronte nos sociétés à des mutations profondes et inédites. Pour les accompagner, nous devons repenser la question politique, le rapport soi-même à l'autre et au monde et jusqu'au sens même de nos vies. Dans cet ouvrage, Véronique Kleck nous permet de mieux comprendre les défis, relever les nouveaux rapports de force et les acteurs politiques de la révolution numérique. Elle nous entraîne dans le projet le plus exaltant et le plus immédiat qui nous concerne tous : la définition d'une philosophie politique pour nos sociétés en réseaux.

De la légèreté Gilles Lipovetsky, 2015-01-07. Nous vivons une immense révolution qui agence pour la première fois une civilisation du léger. Le culte de la minceur triomphe, les

sports de glisse sont en plein essor le virtuel les objets nomades les nanomatériaux changent nos vies La culture matérielle le design l'architecture expriment gatement le culte contemporain de la légèreté Partout il s'agit de connecter miniaturiser dématérialiser Le léger a envahi nos pratiques ordinaires et remodelé notre imaginaire il est devenu une valeur un idéal un impératif majeur Jamais nous n'avons eu autant de possibilités de vivre léger pourtant la vie quotidienne semble de plus en plus lourde porter Et ironie des choses c'est maintenant la légèreté qui nourrit l'esprit de pesanteur Car l'idéal nouveau s'accompagne de normes exigeantes aux effets puissants parfois déprimants C'est pourquoi de tous côtés montent des demandes d'allègement de l'existence d'oxygéner le ralentissement relaxation zen Aux utopies du désir ont succédé les attentes de la légèreté celle du corps et de l'esprit celle d'un présent moins lourd porter Voici venu le temps des utopies light

On entend l'arbre tomber mais pas la forêt pousser Nicolas Bouzou, 2013-02-27 Croire en l'économie de demain l'heure où la crise hante les esprits voici un livre optimiste et stimulant pour nous redonner confiance en l'avenir Pour Nicolas Bouzou l'économie mondiale ne traverse ni une crise si une dépression durable mais une formidable transition vers un avenir plus libre et plus prospère Ce qui est assimilé une crise est en fait une mue le remplacement d'une société par une autre Selon lui nous assistons une sorte de tsunami de croissance les nanotechnologies la biologie les énergies renouvelables l'intelligence artificielle vont bouleverser le monde plus que l'ont fait l'imprimerie la machine à vapeur ou l'électricité Les organisations qui ne s'adaptent pas disparaîtront grandes entreprises assurance maladie éducation nationale En revanche ceux qui survivent connaîtront d'ici quinze ans un monde d'abondance et de liberté la lumière de la grande Histoire mais aussi de l'histoire de la pensée économique et politique l'ouvrage tente de dégager les clés qui permettent de survivre dans un environnement si chaotique et d'atteindre l'autre rive Croire dans le progrès Préférer la nouveauté la tradition De passer nos peurs Ne pas gaspiller nos ressources en protégeant l'ancien Ne pas avoir peur de faire des erreurs mais toujours veiller les corriger

Querelles écologiques et choix politiques Claude Allègre, Patrick Artus, Jean-Louis Borloo, Yves Cochet, Vincent Courtillot, Jean Jouzel, Jacques Le Cacheux, 2011-11-17 Les politiques sur le réchauffement climatique la sécurité des centrales nucléaires après Fukushima l'puisement des réserves en matières premières non renouvelables entretiennent l'inquiétude de l'opinion sans parvenir installer des représentations objectives partagées moins encore un consensus stable sur les mesures qu'il convient de prendre face à ces défis

Comment alors sortir de la confusion Des personnalités particulièrement emblématiques des diverses thèses qui s'affrontent en ces matières présentent leurs arguments et pondent sans détour aux objections de leurs adversaires expriment leurs points d'accord et de désaccord L'objectif d'gager les critères humains économiques et sociaux propres à légitimer une hiérarchisation des priorités d'une politique environnementale efficace et réaliste pour l'avenir

Des étoiles dans la tête Sandra Huret, 2014-11-06 Il a rapidement mergé deux problématiques videntes qui sont les liens entre la créativité et l'intelligence d'une part les liens entre la créativité et la vie motionnelle et intuitive d'autre part C'est surtout l'approche conative qui sera développée ici et la démarche restera une démarche essentiellement naturaliste

introspection des sujets en situation créative puisque il me semblait indispensable de mettre en lumière toute l'importance de la problématique motionnelle et du caractère individuel présents dans la créativité Le travail auprès d'eux ayant su révéler d'une façon particulièrement intéressante ces deux aspects En d'autres termes l'étude auprès des artistes et scientifiques m'a fait saisir toute l'importance des sous-processus individuels s'impliquant et s'intriquant un processus créatif ou encore moteur créatif se résumant incomplètement comme un ensemble de savoir-faire et d'intuition

Quand on parle de créativité l'on recourt fréquemment au champ lexical de la lumière et pourtant les mécanismes l'oeuvre derrière ce processus demeurent opaques et brefs comme inexprimables Faisant la synthèse de ses recherches et réflexions sur le sujet notamment en confrontant art et sciences S. Huret lève un pan du voile sur ce génie proprement humain en convoquant idées et concepts qui clarifient notre compréhension des personnes dites créatives

tay encore par des témoignages précieux soutenu aussi par toute la fascination de l'auteur pour ceux qui inventent et créent ce texte nous entraîne avec respect et curiosité sur cette terra incognita où tout reste à fricher
