Fibres to Smart Textiles Asis Patnaik, Sweta Patnaik, 2019-08-08 *Fibres to Smart Textiles* Advances in Manufacturing Technologies and Applications offers comprehensive coverage of the fundamentals and advances in the textile and clothing manufacturing sectors. It describes the basics of fibres, yarns and fabrics and their end use in the latest developments and applications in the field and addresses environmental impacts from textile processes and how to minimize them. This book serves as a single comprehensive source discussing textile fibres, yarn formation, filament formation, techniques, woven fabric formation, knitting technologies, nonwoven manufacturing technologies, braiding technologies and dyeing, printing and finishing processes. Testing of textile materials, environmental impacts of textile processes and use of CAD and CAM in designing textile products are also included. The book also discusses applications including textile composites and biocomposites, technical textiles, smart textiles and nanotextiles. With chapters authored by textile experts, this practical book offers guidance to professionals in textile and clothing manufacturing and shows how to avoid potential pitfalls in product development. *Thomas Register of American Manufacturers*, 2002.
