THE POLICE OFFICER'S GUIDE TO OPERATING AND SURVIVING IN LOW-LIGHT AND NO-LIGHT CONDITIONS Tony L. Jones, 2002-01-01 The majority of crimes occur during the hours of darkness and fully two thirds of all shooting incidents in which police officers on duty are killed take place during hours of diminished light The goal of this unique book is to increase officers awareness that training in low light and no light conditions is necessary in order for them to prevail in such situations to help facilitate correct decision making under these conditions and to help them understand the use of a myriad of illumination tools available for professional use today Major topics include 1 dim light and no light doctrine including navigation techniques threat location threat acquisition and threat identification 2 flashlight doctrine including many examples of engaging a threat using a flashlight 3 low light weapon sighting systems 4 techniques used for signalling during dim light and no light conditions and 5 illumination technologies supporting tactical and emergency operations including infrared systems thermal imagers night vision systems strobe lights and lasers Through the use of the techniques described throughout this unique and comprehensive book the skill professionalism and ability of police officers to operate and survive in dim light no light and artificial light conditions will be enhanced , *Firearms, the Law, and Forensic Ballistics* Tom Warlow, 2011-11-17 While gun design has undergone only minimal change over the centuries investigative tools surrounding firearm use have grown significantly in sophistication Now in its third edition *Firearms the Law and Forensic Ballistics* has been updated to reflect recently published research and new technology developed since the last volume Beginning with

Pistols Jeff Kinard, 2004-11-23 The development of the pistol helped bring the age of the armored knight to an end provided the elite with a status symbol of dangerous glamour and inspired both artisans and industrialists to reach new heights of invention Pistols follows the evolution of personal sidearms in Europe the United States and Asia from medieval era hand cannons with their clunky ignition systems to the revolutionary Colt revolvers of the 19th century to the modern semiautomatic weapons of today Full of fascinating insights and details this work shows how pistols brought about the decline of knights in armor and ultimately replaced the sword on the battlefield The book also explores the pistol s astonishing democratization as it moved from being a luxury item of the nobility to standard issue for soldiers to a mass produced commodity and source of intensive corporate competition Along the way readers meet the many colorful characters often eccentric geniuses who devoted themselves to pistol development

equations representing the underlying physical laws to chemical problems involving the structures and reactions of small molecules. Corresponding studies of mesoscopic systems have been undertaken much more recently. Molecular dynamics simulations, which are the primary focus of this volume, represent the most important theoretical approach to macromolecules of biological interest.
