Series 7
J7 Monitor

Ultra High Performance Full - Range Monitor

The J7 is the best bookshelf monitor ever developed by Snell, and for its small size, among the best ever. At just 16-inches high, the J7 can reproduce bass as well as most tower speakers, with output to concert hall levels. It resolves the micro-details of nuance and texture, while eerily reproducing a palpable, three-dimensional soundstage.

Developed by Snell's chief engineer, Joe D'Appolito Ph.D., the J7 is a sophisticated two-way with a very low resonance, silk dome tweeter, and a long excursion 6.5-inch woofer. The crossover is constructed with dedicated circuit boards for both tweeter and woofer. This design assures very low distortion, and optimizes performance when the J7 is bi-amped or bi-wired. The natural cherry or black painted walnut cabinet with solid metal end caps is virtually resonance free and hand made by Snell in Massachusetts.

Accommodating real-world room conditions is perhaps the ultimate demand for a loudspeaker. Cosmetic standards like size and finish, combine with room placement requirements to add significant challenges to speaker design. The beautiful, and compact J7 can be a prominent or a discreet part of your room decor. With its boundary tuning features, place the J7 to blend with the room's furnishings. To further compliment room design, the Snell J7 can be matched to most wood and paint finishes.
