Uses Of Values In Legal Education:

Uses of Values in Legal Education Graham Ferris, 2014 Values both constrain and enable behaviour They are a vital source of meaning in human life They may be unconsciously inherited or consciously reflected upon The challenge is to take the greatest advantage of value informed teaching and learning in the context of a pluralist education and society The values legal education imparts or generates impact upon the character of legal professionals The work of jurists impacts upon the quality of public discourse Legal education is under severe threat after a period of tremendous growth across the common law world Legal markets are unstable information technology drives specialisation of labour to new levels rising costs for students and falling returns to the human capital generated by legal education make the prospect of a legal education less enticing Enhanced engagement with values offers the best hope for a positive and coherent response to these pressures by legal educators The Uses of Values in Legal Education makes a start by showing how using values in legal education might fulfil the promise of legal education Incorporation of values into legal teaching and reflection upon values as an integral part of the student learning experience can facilitate the formation of robust and effective individual student identities When this leads to an alignment of student values with life plans it can generate a sense of wholeheartedness in activity that enriches life Students with clear and considered ethical ideas can become effective ethical agents beyond the educational setting This is a must read for anyone designing law curricula He sources his arguments from the fields of literature business economics politics education psychology law and philosophy and he provides both theoretical and practical examples and perspectives This is an important book It is not an easy read the ideas are complex and the range of source material impressive but once the premise is accepted that we have an ethical responsibility to design legal education in the best interests of the law student it is a game changer Rebecca Huxley Binns in The Law Teacher 2016 411 Graham Ferris makes a clear and compelling case for why legal education should fully embrace values He explores how values can be incorporated and taught in the law degree curriculum in order to enhance the welfare and capabilities of law students and restores the link between ethical judgment and professional practice His book makes

actionable guidance on implementing AI in a way that promotes inclusivity sustainability and long term relevance It addresses the needs of legal education institutions faculty and students providing them with the tools to navigate the evolving legal landscape while maintaining ethical standards The book will also be of interest to researchers in the fields of law education and AI ethics *Social Justice and Legal Education* Chris Ashford,Paul McKeown,2019-01-15 Recent years have seen social justice emerge as a powerful driver for work both in law schools and the legal services sector However questions remain about how that term is understood and given meaning within the legal academy and beyond This edited collection explores the meanings that have emerged and might subsequently be developed together with a practical exploration of projects that have sought to bring the social justice agenda to life in law schools and in communities around the world Over the course of eighteen chapters this volume engages with a range of social justice and legal education themes including clinical legal education innocence projects access to justice cause lawyering LGBTQ identities and sustainability in law schools In addition it also explores themes of ethics and values in contemporary legal education in Africa Australia North America and the UK *The Ethics Project in Legal Education* Michael Robertson,Lillian Corbin,Kieran Tranter,Francesca Bartlett,2010-10-06 This book discusses the teaching of legal ethics arguing that the current formal rules governing lawyers are inadequate as true engagement with ethical issues requires lawyers to exercise judgment and therefore there is a need to rethink the aims scope and methodology of legal ethics education The volume presents the views of a number of internationally renowned legal ethicists including Brent Cotter and David Chavkin exploring and questioning the teaching of legal ethics The contributions examine legal ethics teaching in a range of jurisdictions including the USA Canada Australia South Africa and Hong Kong A number of contributors discuss design issues that cover a broad field of methods including simulations the pervasive use of problem solving exercises and real world experiences with some of the essays revealing their empirical findings on the effectiveness of these methods and particularly as they affect the students *Vulnerability and the Organisation of Academic Labour* Graham Ferris,Martha Albertson Fineman,2024-09-20 Vulnerability theory identifies structural and institutional factors that build or undermine the resilience of individuals and organisations This volume uses vulnerability theory to explore how the organisation of the teaching and research activities of universities impact the resilience of academics and also how these activities themselves are impacted by contemporary developments in universities and educational policy The starting point of enquiry is that neither academics nor universities are invulnerable and that urgent attention is needed to reverse developments that undermine their resilience The contributions focus on universities in the US and UK legal education in the UK criminal justice in the UK Brazilian legal education research in deprived communities and the ethics of medical professionals This broad range of subjects is connected by use of vulnerability theory to interrogate academic practices and universities as organisations which should build resilience in their workforce and communities and in so doing secure their own resilience but which far too often fail to do so and actually undermine

resilience It is argued this is not due to malefic intentions but to institutional features of the sector and society Of immediate interest to anyone who works in studies at or relies upon the research mission of universities and to those involved in the management of universities this book will also be relevant to policy analysts and policymakers who will find value in the reframing of vital issues in higher education policy by vulnerability theory allowing a more realistic and productive policy environment to develop This book was originally published as a special issue of The Law Teacher *Transforming Legal Education* Paul Maharg,2016-12-05 Paul Maharg presents a critical inquiry into the identity and possibilities of legal education and an exploration of transformational alternatives to our current theories and practices of teaching and learning the law His work takes the view that bodies of interdisciplinary theory and knowledge of the history of legal education are important to all stages of legal education He also argues that new learning designs such as transactional learning need to be developed to help students educators and lawyers deal with the transitions and challenges facing them now and in the foreseeable future Throughout discussions of theory are spliced with case studies of academic and professional legal learning particularly in the field of technology enhanced learning The content of the book will be updated in a community of practice wiki at <http://www.transforming.org.uk> which will also allow readers to comment and expand on the book's final chapter
