Collaborative Practice in Critical Care Settings Scott Reeves, Janet Alexanian, Deborah Kendall-Gallagher, Todd Dorman, Simon Kitto, 2018-10-10 This practical and evidence based workbook offers a series of assessment implementation and evaluation activities for professionals working in critical care contexts Designed to improve the quality of care delivery it looks both at collaboration

between professionals and between patients and or family members Collaborative Practice in Critical Care Settings identifies the issues relating to the current state of collaboration in critical care through a series of assessment activities provides a series of interventional activities which can address shortfalls of collaboration previously identified and offers advice on generating evidence for the effects of any interventions implemented The activities presented in this book are based on extensive empirical research ensuring this book takes into account the everyday work environment of professionals in critical care units It is suitable for practitioners and educators as well as patient safety leads and managers

Guide for Producing Figures with Graphic Template Language (GTL) Using SAS Antonio Rodr'guez Contest', Sebasti^ Barcel—Bau♦^, 2020-01-23 The idea was to create a book useful for the day to day work as a consulting guide To do so we created a book with a lot of code and explanations of the most common and not so common options that can help into the graphics production All the figures presented in the book contain the code to be able to replicate always using data available for everybody such us using SASHELP library or generating our own data At the same time we tried that was accessible for all levels It goes from a really basic level explaining the SG procedures SGPLOT SGSCATTER and SG PANEL and increasing in complexity little by little showing how to extract the GTL code from the SG procedures introducing PROC TEMPLATE and the different layouts until we reach the final chapter where we create the shells for the most common figures using all the learned to create common output requests
