Kleindorfer,2011-01-01 This compilation of original essays by an international cast of economists regulators and industry practitioners analyzes some of the major issues now facing postal and delivery services throughout the world as competition from information and communication technologies ICT has increased Competition has become increasingly important in the postal sector for some time in the form of alternative entrants providing mail delivery However the competition from ICT in the form of email and instant messaging the Internet Facebook and other forms of social networking and portable wireless devices such as the iPad and Kindle may be even more significant Mail volumes are falling and the economies of scale that have made possible daily deliveries to every address are being eroded This book assesses volume these declines resulting from this so called eSubstitution and looks at the ways the postal sector can adapt to the rapid changes resulting from ICT The impact of electronic invoicing on transactions mail and the impact on bulk mail of electronic forms of advertising are examined Strategies including pricing and access policies are discussed in the context of the increasing impact of ICT A rethinking of the role of mail in an electronic age is taking place and this book provides the cutting edge of this rethinking and the attempts of POs to reinvent themselves while continuing to meet the public s expectation of continuing ubiquitous daily deliveries of traditional mail products Undergraduate and postgraduate students and researchers in regulation competition law innovation and public sector economics along with institutional libraries and industry professionals will find this volume informative and useful **U. Hearings, Reports and Prints of the House Committee on Post Office and Civil Service United States. Congress. House. Committee on Post Office and Civil Service, 1974 Letters, Power Lines, and Other Dangerous Things Ryan Ellis, 2020-03-03 An examination of how post 9 11 security concerns have transformed the public view and governance of infrastructure After September 11 2001 infrastructures the mundane systems that undergird much of modern life were suddenly considered soft targets that required immediate security enhancements Infrastructure protection quickly became the multibillion dollar core of a new and expansive homeland security mission In this book Ryan Ellis examines how the long shadow of post 9 11 security concerns have remade and reordered infrastructure arguing that it has been a stunning transformation Ellis describes the way workers civic groups city councils bureaucrats and others used the threat of terrorism as a political resource taking the opportunity not only to address security vulnerabilities but also to reassert a degree of public control over infrastructure Nearly two decades after September 11 the threat of terrorism remains etched into the inner workings of infrastructures through new laws regulations technologies and practices Ellis maps these changes through an examination of three U S infrastructures the postal system the freight rail network and the electric power grid He describes for example how debates about protecting the mail from anthrax and other biological hazards spiraled into larger arguments over worker rights the power of large volume mailers and the fortunes of old media in a new media world how environmental activists leveraged post 9 11 security fears over shipments of hazardous materials to take on the rail industry and the chemical lobby and how otherwise marginal federal regulators parlayed new mandatory cybersecurity standards for the electric power industry into a robust system of accountability *International Marketing Research* V. Kumar, 2024-07-08 This book provides a practical detailed and well documented guide that takes students and market researchers through all phases of developing and conducting global marketing research This book not only accounts for the recent developments in the scope and extent of global marketing research but also examines advances in both quantitative and qualitative research

The Changing Postal and Delivery Sector Michael Crew, Pier Luigi Parcu, Timothy Brennan, 2017-01-20 This book addresses some of the major issues facing postal and delivery services throughout the world Postal operators worldwide have been slow to address the threats from and opportunities created by electronic competition The European Commission and member states are wrestling with these issues while at the same time continuing to deal with the interrelated issues of implementing entry into postal markets and maintaining the universal service obligation The Postal Accountability and Enhancement Act of 2006 in the U S exacerbated financial and managerial problems faced by USPS that result in part from electronic substitution for letter delivery Comprised of original essays by prominent researchers in the field this book addresses the new reality of the postal industry and proposes ways in which postal operators might reinvent themselves Issues discussed include cross border parcel delivery e commerce the transformation of postal networks and the effects of postal liberalization This book will be of interest to postal operators regulatory commissions consulting firms competitors and customers experts in the postal economics law and business and those charged with the responsibility for designing and implementing postal sector policies Researchers in regulatory economics transportation technology and industrial organization will also find useful information in this volume
