IMPORTANT

Check Your Power Supply

Make sure that your local AC mains voltage matches the voltage specified on the name plate on the bottom panel. In some areas a voltage selector may be provided on the bottom panel of the main keyboard unit near the power cord. Make sure that the voltage selector is set for the voltage in your area. The voltage selector is set 240V when the unit is first shipped. To change the setting use a "screwdriver" screwdriver to rotate the selector dial so that the correct voltage appears next to the pointer on the panel.
