

## Chapter 2 - Frequency Distributions and Graphs

## EXERCISE SET 2-1

1. Frequency distributions are used to organize data in a meaningful way, to determine the shape of the distribution, to facilitate computational procedures for statistics, to make it easier to draw charts and graphs, and to make comparisons among different sets of data.

2. Categorical distributions are used with nominal or ordinal data, ungrouped distributions are used with data having a small range, and grouped distributions are used when the range of the data is large.

3. Five to twenty classes. Width should be an odd number so that the midpoint will have the same place value as the data.

4. An open-ended frequency distribution has either a first class with no lower limit or a last class with no upper limit. They are necessary to accommodate all the data.

5.

Boundaries: 57.5 – 62.5

Midpoint: 60

Width: 5

6.

Boundaries: 124.5 – 131.5

Midpoint: 128

Width: 7

7.

Boundaries: 16.345 – 18.465

Midpoint: 17.405

Width: 2.12

8.

Boundaries: 16.25 – 18.55

Midpoint: 17.4

Width: 2.3

9. Class width is not uniform.

10. Class limits overlap, and class width is not uniform.

11. A class has been omitted.

12. Class width is not uniform.

Sally Robinson of South Plains College this manual contains detailed solutions to all odd numbered text problems and

answers to all quiz questions *Practical Research and Statistics* K.J. Kovach,2018-03-19 The main aim of this new book is

to provide a single efficient and effective source for college and university students to understand research development and

learn then apply statistical concepts while developing a Research Proposal or Research Study using the American

Psychological Association APA format It is a specialist text particularly well suited for introductory accelerated and short

courses that emphasize quantitative approaches within research activities After teaching over 30 years the authors know that

several different texts commonly must be bought or used in learning to develop a research proposal or research study

Additionally many colleges and universities have combined various research and statistical courses into one course or

program Students therefore have to learn what research is and its many concepts learn various descriptive and inferential

statistics and apply APA format for completed reports during one school term Instructors as well as students easily

appreciate that a detailed grasp of the above three components during a single university course would be a daunting task

Hence the authors offer this practical integration and application of all three components into a single recommended text as

an efficient effective bridge to learning these complex areas Mind Maps are used to help readers organize the many detailed concepts and techniques herein These Mind Maps are presented with the central concept at or near the middle of the diagram and subordinate concepts and techniques arranged as branches clockwise from the upper right around to the upper left For Instructors adopting this text an Instructor Guide chapter PowerPoint R files and Test bank will be provided to facilitate the one course concept email a request to KJKovach@btinternet.com See also the authors web site <https://PracticalResearchandStatistics.com> Authors Note Certain technical examples and tables may not display as desired in the ebook version of our text particularly on smaller screens You may download pdf versions of selected tables figures and examples from the authors web site <https://PracticalResearchandStatistics.com> Alternatively viewing our text on a larger display PC or Mac should resolve most display issues
