Harbaugh, 2021-09-01 In this first book of the series Survey Methods in Educational Research we have brought together leading authors and scholars in the field to discuss key introductory concepts in the creation implementation evaluation and dissemination of survey instruments and their resultant findings While there are other textbooks that might introduce these concepts adequately well the authors here have focused on the pragmatic issues that inevitably arise in the development and administration process of survey instruments Drawing from their rich experiences the authors present these potential speed bumps or road blocks a survey researcher in education or the social sciences might encounter Referencing their own work and practice the authors provide valuable suggestions for dealing with these issues your advisor never told you about And all of the recommendations are aligned with standard protocols and current research on best practices in the field of research methodology This book is broken into four broad units on creating survey items and instruments administering surveys analyzing the data from surveys and stories of successful administrations modeling the entire research cycle Each chapter focuses on a different concept in the survey research process and the authors share their approaches to addressing the issues These topics include survey item construction scale development cognitive interviewing measuring change with self report data translation issues with surveys administered in multiple languages working with school and program administrators when implementing surveys a review of current software used in survey research the use of weights response styles assessing validity of results and effectively communicating your results and findings and much more The intended audience of the volume will be practitioners administrators teachers as researchers graduate students social science and education researchers not experienced in survey research and students learning program evaluation In brief if you are considering doing survey research this book is meant for you **Cryopreservation** Marian Quain, 2020-06-10 Cryopreservation Current Advances and Evaluations sheds light on storage of cells at subzero temperatures while ensuring that biological functionality is not compromised Cryopreservation presents a perfect technique by which life can be preserved for posterity However there are many challenges to overcome and questions to answer such as Are organisms and metabolic systems functioning normally after cooling and thawing This book provides comprehensive information on cryopreservation with a particular focus on cryoprotectant agents CPAs CPAs prevent ice from forming on

cryogenically preserved cells tissues and organs but can become toxic at high concentrations As such more research is needed to determine their precise mechanisms of action and to develop potential new CPAs that will not compromise the biology of cells This book is an attempt in this direction The New Nihilism Costantino Esposito, 2024-11-01 In this highly engaging book Costantino Esposito argues that nihilism is not merely the loss of the classic values of the Western tradition rather it presents a critical opportunity to ask pertinent timely questions about the meaning of self and the world Nihilism is a problem that has troubled the culture philosophy and worldview of people and societies for more than a century a problem that seemed thanks to the advance of cultural relativism to have become an obvious and globally shared condition However in recent years the conversation around nihilism has begun to change The questions that nihilism once declared impossible to answer questions about the ultimate meaning of self and reality the truth of the person and history our desire to understand ourselves in relation to the infinite are reemerging in today s culture and proving to be profound reasonable and of vital importance In its classical form nihilism is the loss of values and ideals but its modern iteration manifests as an irreducible need more basic but far more challenging Esposito suggests that rather than being an obstacle nihilism can become an opportunity to search for true meaning for our experiences in the world With philosophical rigor he intercepts and narrates this new phenomenon focusing on social trends poetic voices philosophical and scientific visions ethical problems and aesthetic experiences The New Nihilism unravels and makes sense of the real stakes of the existential crisis of our time
